Thread: [\[TUT\]\[SPREADING METHOD\] EFFICIENT SPREADING METHOD\[FREE\]](#)

Aizen Sama - November 11, 2014, 3:14 am

Today I'll share a little EFFICIENT SPREADING METHOD.

What is Spreading?

Spreading is the method of RAT Diffusion. All depends on what you would like to do with your victims, but also what type of victim you like to have. More the art is tightly structured was more victims.

The technique I'm going to share with you, you can make Spreading combined with social engineering techniques as any Spreading method

you'll need a little time and patience, No pain No gain. The first time I used this technique I had 80 slaves in less than one day.

Prerequisites

- A computer (obviously)
- A RAT FUD and well set
- A Fake program
- 2 hours of your precious time

Success rate 70%

Step 1 (Accessory)

Create an Email address (as a professional) as [éditeur@photographer.com](#) or [paparazi@photographer.com](#).

Use Mail.com, you will have the domain names you need. You can also use any email, Gmail or yahoo or whatever.

Step 2 (registration)

Create a Facebook page and subscribe to the group for Fan star (Pharrell williams Fan Page or Jennifer Lopez or Justin Bieber Fan Page).

Visit forums and fan star create some accounts.

Make a Post on sites Freelancer jobseeker.

Visit the Public Ad Sites

Visit the Teenager site Forum

Visit FootBall, or Basketball Star Fan Page and sport forum

Step 3 (Your Post)

Post on your various forums something like:

" Hello, My Name Is Adams Williams, I'm a professional photographer and paparazzi (madonna, rihanna, justin bieber, pharell williams, Lebron James ...), I am looking for Freelancer for adding comments on my photos and post them directly to my website and send these photos by mails to various peoples newspapers. I pay \$ 1 for each photo posted or sent. No professional knowledge required, just a little time and a little availability including weekends for the post because I do not have time to do it.

Contact: Your Name and Your MAIL ([xxxxx@xxx.com](#))

Step 4

Do what you do with your day and reconnected a few hours later on your email. You'll have

answers in your email box. All selected and sent an email group (Cci, hidden recipient)

" Thank you for your interest. Thank you to kindly pass the test and familiarize yourself with the process, only 30 people will be selected and I think you will be part. Thank you for posting this picture (send a photo of star) and download the Comment-tool here (link to your Fake program in which you will Bind your RAT) to add a comment. And send it to this address (Any mail or small newspaper people Fake email). Thank you"

Step 5

See the results yourself , during the next day.

Thanks for Whatching. (Thank you to correct the various spelling fault. PM me to do the neccessary change.)

This is definitely a new method which I haven't seen yet. Could you maybe post a pic of your results? I will try this out I just got IM3 and I am looking for new methods. There are to many fake programs on youtube lol so its kind of a saturated method and torrenting takes time to get seeders lol. Anyways I will try this, it would be nice though if you had a pic of the number of slaves you got some sort of validation. I will post results soon and maybe you could bind your server with a picture using a ico converter and that would make it seem even more legit lol. Just go to like google images and find ridiculous pics of the celebs and then google ico converter if you don't have a jpeg option like darkcomet does ?

tldr - November 11, 2014, 1:14 pm

nicely worked out bro, keep up the good work!

Danny Phantom - November 11, 2014, 2:06 pm

Thanks op so much for this useful guide and tutorial I will remember to bookmark this thread and come back here.

Most spread techniques are public, the best techniques are those that you create yourself, they are unique and efficient.

My computer is down, I can take a new one. So I have to take back to zero.

Let a thread alive, the images come shortly.

Natalie Dormerr - November 11, 2014, 9:05 pm

thanks for the response, now you can calculate slaves per hour sucks ur pc was down though

shreechetlur - November 12, 2014, 5:30 am

Thanks Really Really helpful Buddy!!!!

inkbird - November 12, 2014, 5:34 am

Great stuff man. Really appreciate this. Its a nice method

Aizen Sama - *November 12, 2014, 11:13 am*

Thank you !

if you're any question about this technique let me know here.

i Help you

I will share a lot of other method soon

Marie00 - *November 12, 2014, 12:24 pm*

merci je vais voir sa sa à l'air intéressant.
