There are a lot of you out there who don't know how to make a e-book and you tube videos are outdated well here is a simple tutorial :)

You will need:
Microsoft office

LARGE IMAGES

Step 1: Open a blank document

Spoiler [\(Click to View\)](#)

Step 2: Fill out the document as you want your e-book to look like

The end result:

I believe it is 2010 and 2013 for old versions you will need a converter which are easy to find.

The most of the users here know how to create an ebook.;)

Anyway thank you.

Very well done. 11/10 for creativity.

Don't forget to include the \$1k+ / per hour.

In all seriousness, vouch for OP's actual eBook. It's a good method if anyone's interested.

Vouch for this eBook. The OP took his time making it, and the method is explained thoroughly. Here's my earnings so far Spoiler [\(Click to View\)](#)

I am a certified reviewer and was given a vouch copy by the OP.

Grammar 10/10: Not much to say here

structure: 11/9 illuminati: The ebook consisted of a total of 1 page that consisted of a total of 5 words.

Method 420/10: Easily made thousands from this method by applying these 5 words into my everyday life. Made my first 420k in my first 69 seconds of reading the ebook.

overall 1337/10: Vouch for this stresser hits hard as a sack of potatoes hitting you on the balls at 30mph while you're asleep.

I have 2007 on one comp., and 2010 on the other

I'm sure 2007 doesn't have it

Maybe 2010/2013?

GLWS.

Vouch.

Scammed.

Made a billion \$.

Bought a Ferrari.

Bought a Lamborghini.

Charge backed.

?

Or you simply use CutePDF Writer (which is totally free) and it will correctly print the document in a .PDF format, while saving that document directly as a PDF from Word could cause corruption. But that's meeee.

Should rename to "[Tip] Create PDF file from Word document"

Will do, also word 2010+ allows to be saved as a PDF from the drop down menu to avoid corruption.

Yeah. 2013 too. Will check later.

Should put pictures inside spoiler tags since they are huge and on mobile its a pain. Even on the computer earlier it messed up the page.
