What are your thoughts? Please point out something you believe should be on the list of adjustments.

Adjustment list:

- Social media icons
- Use more space within the body
- Add a stock image

This is more of a wireframe atm. Seeing your previous work, you can do better than this.

Don't use all caps in menu with this font/size. If you gotta use all caps, smaller size with more weight would look better. Not digging color scheme either.

Looks rushed overall.

Sounds good, I just dug out my old navigation and worked from there. Might as well finish her off and start fresh.

Thanks though, Its been awhile and I need to create a decent project for once.

Very cool, love the style!

Keep up the good work!

I dont really like this but overral is good but you can do better.

You seriously have to do something about the grey parts as it is too plain in my opinion the menu looks decent could use more effort though. I kinda like the color scheme of the menu.

Really love the minimalistic look on it :P I think that the menu text being all capsed is not attractive to the eye. Overall I like it :D

I like it, it is very simple and clean (which looks the best imo)
Good job!

Is this an actual website you are developing or is this just the design?

Nofs.y - November 14, 2014, 4:25 am

Looks nice so far, few things I'd like to point out though the links(/text) on the left should be a little smaller imo

and I'm not a huge fan of the social icons on the bottom. Another thing, the "Young, yet truly a professional web designer" just makes me want to commit suicide
please change that to something more professional and less cringey
