>>>Super Quick Way Of Spreading<<<

Okay, so this is my first guide/tutorial.

Lets start...

Introduction

I am going to teach you how to get 1000's of victims in the space of a month, possibly some money out of it aswell.

What you will need:Java Drive By(make sure trojan is crypted),

Facebook,

Blogspot or a free .info domain([click here](#) for free .info, This is for money making option),

CPAlead Account(Optional if you want to earn money, but less people will get infected).

Step 1

Go To This Link [*LINK*](#) to create a facebook page.

Step 2

Give it a name that will want to make people think that they stand out.

For Example "95.2% of People cry after seeing this". Now that will make people want to look at it.

Step 3

Click here to go to the "Static FBML" Page, and under the Picture(left) click add to my page, and select the page you have just made.

Step 4

Go back to your page and add a new tab, there should be an option called "Static FBML", select it and there should be a new tab :).

Step 5

Go back to the Wall of the page, and click edit page under the Photo.

Step 6

Scroll down till you see "Static - FBML" and click Edit.

Step 7

Give the Tab a Name, And now this is where it gets complicated...

In the Main Content Box type something like Like This Page TO See The "WHATEVER"

Then hit return/enter and paste this code in after that:

Code <fb:fbml version="1.1">

<fb:visible-to-connection>

DELETE THIS WRITING HERE

</fb:visible-to-connection>

</fb:fbml>Lets proceed to the next step.

Step 8

Open up a new tab and setup a JavaDrive(unless you already have one), and if you want to earn money with it embed CPAlead into the "index2.html" of the Drive By Files.

Step 9

Now remember/copy the code and replace it where it says DELETE in the code below.(NOTE: USE T I N Y U R L/.tk TO DISGUISE THE LINK AS FACEBOOK MIGHT BLOCK IT)

Code
>>CHANGE TEXT HERE TO WHATEVER YOU WANT<<<</br>Now you can change the font/sizes ETC in html but i am not gonna teach you that now...

Hit "Save Changes" once done...

Step 10

Invite all your friends on your friend list.

Step 11

Sit and wait, Last night i made a page, and i went to sleep with 48 people in it.

I woke up this morning and magically had 1889 people.

But i didnt use my Drive By, i just used CPAlead + a Crappy Picture.

Hope You guys liked this. If its not too much trouble join my group(not Driveby) [*LINK*](#).

~Tom~ - June 1, 2010, 5:21 am

Not a bad tutorial actually :)

I remember seeing your Facebook Page yesterday in a thread, and only had one person who liked it. Now you have nearly 2,000 in one day ?

?pic - June 2, 2010, 2:20 pm

Np Guys :)

The Static FBML is if you type it where you search for friends...

nak15 - June 2, 2010, 3:05 pm

I'm confused at step 7.

Do I delete writing above or below it, or all of it.

and step 9:

What do I put in delete. Do i change it to my java drive-by url?

ZhivagoMods - June 2, 2010, 3:10 pm

yo this guide is beast. 28 dls in like 30 mins. I need to know how to change the font and things like that. can u post a tut

?pic - June 2, 2010, 3:21 pm

You can change the Fonts in dreamweaver :)

And

nak15,

There the "*" are, anything on that line gets deleted.

And you change the "DELETE" to your driveby URL

ZhivagoMods - June 2, 2010, 3:40 pm

dreamweaver is an app on facebook??

?pic - June 2, 2010, 3:42 pm

No, But what i done is that i copied the Static FBML code,

Went to dreanweaver,

Pasted the code in the code section,

Edited it in design mode,

then i copied code and pasted back in The statick FBML box...

Also can you join this page(no virus):

<http://www.facebook.com/#!/pages/This-Picture-Made-953-Of-All-Boys-Cry-and-972-Of-All-Girls-Lau-gh/121525821216252?ref=ts>

And possibly invite some friends :)
