So let me get this straight. You "just" want to give back to the community, but you don't want to help people with an account already? Beginners might fall for this crap but experienced folks won't. You want to take advantage of these people and earn from the referral commission that you'll get from them. At least be honest and don't look like an idiot.

What exactly are you going to teach them that they couldn't learn on their own? Additionally, 'mentoring' people is just stupid. People who really want to succeed in this business should find answers and solve problems by themselves. That's the only true way they'll ever learn. But they will know some day.

And also, why even bother to 'help' people for 3-5% commission rate? Why not just scale your own stuff up and earn 100% yourself?

I don't believe in helping people for money. That just states that you're interested in his money and not actually wanting to help.

You contradict yourself.

First you say I only do this for the referral money I earn, second you ask me why I even bother to help people because the referral commission is really low.

And this leads me to the exact reason I do this, to actually help the community. I also got taught the ways of PPD and I'd like to return the favor to HF.

The reason I won't mentor people who already have an account is because then I would have to mentor a lot of people without knowing if they will really use my methods (also my methods might get saturated). This way I earn a little and make sure that the people who sign up under me are

really serious about earning and will put time and effort into it.

Also why would I have people sign up under my ref if they wouldn't earn anything? I am actually teaching them to earn big amounts so I myself can also profit from it. If they make \$0 I make \$0, it's that simple. I want them to succeed, for their and my own benefit.

It's a shame there are always people on HF who have to be so negative.

?

If that's why, why not pick 50 people that aren't referrals and 50 that are? ?

I'm not trying to take you down or anything. Next time just don't give people bullshit reasons because you want to make money. You just declined a guy because he couldn't be your referral.

Be honest to the people! ?

In case I'm 100% wrong and you're in this for the community and not the money(doubt it), then thanks for contributing! I'm not contributing much myself as we all have our own problems.

But remember, the 100 people you choose are beginners and need your help. They have faith in you, and might even be in a very bad situation. They count on you. Most people give them a sad little PDF with their referral link. And that sad little PDF is worth nothing.

I hope you don't think I'm all about being negative. I don't know you and you don't know me. I'm not being personal to you. I'm only commenting on behalf of what you wrote.

I hope this makes sense. I'm writing this as I'm listening to music so this might be a damn mess! ?

EDIT:

Ok, I just read my own post. It does sound hateful and negative.

I LOVE YOU, OP. :D Please don't take it the wrong way! I don't mean any harm to you! <3 :p

I LOVE YOU, OP. :D Please don't take it the wrong way! I don't mean any harm to you! <3 :p Because if they can register under my referral, it means that they are willing to put effort into it. If they are willing to put effort in so am I to teach them.

Teaches 100 people the ways of PPD (not by just giving them a shitty ebook) takes a lot of my personal time and I'd like to be compensated for that lost time through referral earnings. Creating more niches would bring me more money than referral earnings.

I won't give the people I teach a shitty ebook and then let them hang, I'll guide them through the entire process.

I know most people I teach are completely new at this, but I've successfully taught people before and some of them make even more than me now.

My referrals can always count on me. ?

Glad you didn't mean any harm, love you too ?

He sent me the pack and I can tell you from the start - I've seen most of those ebooks and some of them are useless (for me at least). But, I gotta tell you this as well. I took a quick look and I can see that there is something useful that I'm going to use for sure! Tomorrow I'm gonna go through all of those to see what's good and what's bad, but there is something good. The pack contains some good landers, niches and viral scripts. Also, Kodra is very friendly and he explained some of the stuff for me already so, I think this is not a bad referral program.

Since couple members get accepted , would be nice to hear more information from them .

What you think about Kodra's mentoring service , did you earn money ( if you are will be nice to see your earnings with screenshot ) ?

What is the level of support ? Did you get answers for your questions .

I'm interested too , but before I sign up with the referral links I would like to get more information from the users which are approved and started already with those methods .

I've updated the thread link again.

I've created a new high quality blog post explaining everything.

Go check it out!

Thanks for the vouch and congratulations on your earnings bro! ?

Is this only for complete noobs?

I mean, I'm not making anything right now, but I understand the basics. My problem is with finding working niches, with good searches and low competition.

So I don't need anything from the very start, if you know what I mean.

Are your referrals already making any money?

How long until we start making the \$10/day you say?

About 90% of my referrals are making good money.

If you work hard and follow my instructions you should be able to make \$10/day within 1/2 weeks.

**xMadnez** - December 7, 2014, 12:25 pm

So i signed up under Kodra and really there's only good things to say . He provides you with a lot of information and everything you need in order to start and understand CPA , i want to make a point ,

his Skype support is superb , of the queries I've had he's responded in literally 2 minutes , this is a great place to start for anyone new to CPA , i would highly recommend this .

Vouch
