Thread: [Scam Report " Orway Crypter" Prestigio UID=1848412](#)

spiderfady - November 14, 2014, 6:18 pm

Haha guys this crypter is just a joke, all it's options is fake, at the first i thought all the bad reviews on his thread was guys fighting him because he made a magic crypter but after i bought it, i discovered that he deserves more than 200 bad review

I was one of this guy fans and if you read what i wrote in one of the scam reports that some one made coz Prestigio scammed him you will see how much i was respect this guy

Code <https://hackforums.net/showthread.php?tid=4505910&pid=43005232#pid43005232>

But this man is really drunk, he coded a junk product, trust me guys i swear most of this crypter options are fake

If you got time to read this you will laugh so much..

when i faced a big problem with start up and persistence options

he challenged me If he can prove to me that he can make those options works

i will lose my license and if not i will get free 30 days

he told me to install a fresh windows on VM

But what happened is really funny he just crypted a cybergate server without startup and persistence and he didn't even use the VM to prove that the startup and persistence are working, and guess what he banned my license coz he Win (as he thought) i guess he was drunk !! ?

By the way one of his thread vouch is mine" i wrote it before i use this crypter"

Code The only thing that makes me upset is that he gave me -3 Negative reputation so that i can't post in his thread.
