Thread: [Stresser Management. - Start a Stresser.](#)

ablationvector - November 15, 2014, 8:38 pm

I can make "custom attack scripts" designed to your need for a certain price.

I have quite some knowledge in the SST field, and I need to make some cash, so here's a little service that I'm making.

I will provide you with:

- Scripts
- Lists
- Scanners
- Stresser Sources
- API Sources
- Knowledge
- How-To-Use
- Explanations as to the attack method
- Custom scripts

Send me a PM with your Skype or Jabber for more info.

Can you provide APIs that actually hit targets as well included in that price?

"That actually hit targets" - LOLed at that one. So the SST market here is that trashed up huh? :l

I can provide private or shared API's.

If private, all attack scripts and the API source will be customized to your needs.

My prices aren't high and I can cooperate easily with anyone that treats me with the same amount of respect I treat them with.
