Nivarka - November 16, 2014, 1:51 am

Need a hand getting started in HackerCraft?

Need some enchanting books or lv 30 enchants? How about a few resources to get you going, beyond the initial kits? Or maybe you simply need access to a decent location, or some tips on getting started on our server.

Whatever it is you need, simply make a post including your IGN and I will do my best to help you out.

The more you've contributed to HF, the more I'll contribute to you.

I intend for this service to carry on for a long time.

Menacing - November 16, 2014, 2:37 am

Hello Nivarka!

As you can see, I am very new to HackForums, although Minecraft is one of my favorite hobbies! I came across HackerCraft today and I really enjoyed exploring but I just couldn't find a good place to start and I kept dying!

Tomorrow I plan on donating, as I would love to keep the server going as the people on it are nice.

I'd love it if you could help me with some items to get started, give me some tips, and help me find a location

to build my base at! Thank you for making this thread and I hope you can PM me back when your in-game to give me a helping hand!

My IGN is: Avereid (Please PM me when your going in-game though!)

Thanks, and keep up the good work!

MrOrang - November 16, 2014, 2:47 am

I'm thinking of starting an actual base on hc, only mined out a little area and got some resources now but maybe I'll need your service later on when I become more active on HC.

Nivarka - November 16, 2014, 4:23 am

I look forward to helping you.

The next person to post can have a free level 30 enchant.

These are prohibited from use on HackerCraft.

However you may use a client modification such as Huzini to increase the screen brightness ONLY.

Huzuni is a free, easy to use multifunctional client with many capabilities. It supports version 7.1.10. Please contact me personally if you would like any advice on choosing a paid client.

Of course, the use of clients is detrimental to servers with economy systems, so I advise you to check with sever administrators before loading up modified clients.

I can once again offer free lvl 30 enchants to users.

These will be earned through grinding, NOT using admin powers.
