HackForums Giveaway: Servers for one month at no charge.

Note: Please read the entire thread, including the Terms of Service, before entering to win. Any malicious activity is immediately detected and the server is automatically suspended. If you don't respect that simple rule, I'll make sure the community knows.

About Us

Pulse Servers has been providing powerful server solutions for a competitive price since 2012.

Our clients get access to step-by-step guides and video tutorials for common tasks like server installation and updating.

We give you full control of your own powerful server machine, which you can use to host your web, database, voice, game, radio, FTP, IRC, cloud, and VPN servers, to name a few.

For example, you could run your website, SQL, TeamSpeak, Team Fortress 2, Garry's Mod, Minecraft, FTP, and VPN server all on one powerful and protected server.

Our company is registered and licensed to be selling our servers and using the applications we utilize in a commercial environment.

What do we offer?

[img]<http://www.pulseservers.com/img/info.png>[/img]

[img]<http://www.pulseservers.com/img/pricingsmallFREE.png>[/img]

Where are we located?

We have clients all over the world.

By locating our servers on the Eastern coast of North America, we're able to provide a great latency (ping) to both America and Europe.

A ping of 150 or less is desirable for optimal performance.

The average pings are below:

United States -- 48ms average between 43 servers

Canada -- 49ms average between 5 servers

Central America -- 89ms average between 4 servers

Europe -- 109ms average between 35 servers

Europe (United Kingdom) -- 88ms between 3 servers

(A latency chart with country specifics is available at <https://i.imgur.com/t51PiHY.png>)

Our promotions and giveaways are announced on Facebook and Twitter!

Terms of Service

No DDoS related activity or software associated with malicious activity (attacks, bombers, mailers, scanners, PHPSHELL, cracking, spoofing, etc.)

Any malicious activity is immediately detected and the server is automatically suspended.

How To Acquire

After determining whether servers are available or not by reading the thread and the last page of replies, L33t/Ub3r users may contact me by posting on this thread, and should indicate whether they want a VPS 1, VPS 2, VPS 3, or VPS 4.

I will contact them with a coupon code, such as HFABCD1234 to get your free server for one month.

Please only request a server if you're actually going to use it.

Light that Blinds - November 17, 2014, 1:03 am

are you allowed to use the servers for ddos

Tekkie - November 17, 2014, 1:06 am

I've had multiple users ask if the server can be used for DDoS attacks. Just to clarify, the server cannot be used for launching attacks against others.

This is stated in the original thread. Please make sure you read the entire thread so you know exactly what you're getting. Plus, the specs are so good that you'll enjoy reading about what you're going to get for free!

TerminalOne - November 17, 2014, 1:07 am

You should put Leet/Uber in the title.

I thought I was going to receive one lol :(

This is the view of the threads in the forum:

If you've got a good idea for a project that you think our servers could help you achieve, send me a PM and I might give you one anyway.

For some reason I totally ignored that part, sorry.

Also, why are Asian/Oceanian countries not listed on this list?

<https://i.imgur.com/t51PiHY.png>

Or is the ping just too high and you're not looking for customers in that region?

Locklyon - November 17, 2014, 1:12 am

I would love to get VPS 4

Thanks a lot!

Raoul Duke - November 17, 2014, 1:14 am

Hello I would like to have a VPS4 if it's possible? I will use it for testing minecraft plugins before I add them on my main server.

Thank you by advance

That's a very good point. The pings will be higher, but they won't be unacceptable. That's certainly something I should include!

Glad to hear! Thank you, too, for letting me know!

If you'd like to change or reinstall your OS, submit a ticket requesting that we change the OS for

you and that you're aware that all data will be lost during the format.

We'll be changing it soon so that you'll be able to reinstall and change OS by yourself.

Your image does not load for me. I'm not sure if it's ABP blocking the website that's hosting the image, or the strange reference to the image that is between the IMG tags.

Thanks for the kind words, and for providing some useful information! I'm glad to see everything is working well for you.

Unfortunately, I have already given away seven free servers. I only planned to give out five.

I will be doing giveaways on a somewhat regular basis, so keep posted.

A special shoutout to [Alkair](#) for abusing the giveaway by using the server to attack a residential connection in England, despite my original post AND a separate post in this thread stating that DDoS attacks were not permitted. His server has been terminated.

Blessed with Hacking - November 17, 2014, 4:26 am

I see that this giveaway was definitely something the community found useful. Only one of the seven servers I gave out have been terminated, so six people are now able to get something useful running!

I will be running more giveaways/competitions in the near future, and I will make sure that all of you get sent a PM as soon as the next thread is created.

Dokkii - November 18, 2014, 11:06 pm

I would like to try out this VPS

Because looks like a HQ Service.

razzy4realbiz - November 18, 2014, 11:11 pm

Same here mate if you don't mind, I hope to get one for a trial. Thanks

kannss - November 19, 2014, 12:10 am

VPS 3 Please.

Thanks for this OP!

Tekkie - November 19, 2014, 2:05 am

I'll be continuing to post server giveaways soon.

Sub-Zero™ - November 19, 2014, 2:27 am

I'll def be looking out for the next giveaway to see how well the servers are for game servers and such.

Most of our clients use the servers to host their websites, game servers, and TeamSpeak servers, all on one box.

I would like the VPS 4, Thanks in advance! ?

Tekkie - November 19, 2014, 4:25 am

Flash promotion for all members: Use the coupon code OCJ5YG1GPM to receive your first month FREE! Valid on VPS 1 - VPS 4. This code can only be used once, so hurry!

Once you've used the code and have received your free server, please let us know that you were the lucky winner by posting a vouch!

For Leets/Ubers, I'm doing a drawing here: <https://hackforums.net/showthread.php?tid=4544673>

Same here I'd like Vps 4 please :D

Thanks :)

?? ???p? - November 19, 2014, 8:51 am

I'd like a vps4 server as well my friend if it's still possible :)

TheBlueOwl - November 19, 2014, 9:55 am

I would love to get VPS 4

Thanks a lot!

Tekkie - November 19, 2014, 10:19 am

The five free servers actually turned out to be seven.

There was a flash promotion code for all members posted above, as well as a link to a drawing in a different section for Leets/Ubers.

I'm making sure the flow of free servers continues, but at the moment, I've handed out quite a few already in this thread. I'll create a new thread with a new server shortly.

Madcow12345 - November 19, 2014, 10:41 am

I would definitely utilize this VPS, I've been searching for a very long time for a reliable company that actually has good service. I don't prefer to use big box companies either as then you are just a number. I would like to test out VPS 4 and if it is good will be purchasing a yearly subscription upon termination of the free month.

SIM-2223238 - November 19, 2014, 10:42 am

Could I have VPs 4 please, I need it for a VPN ^^

.Justice - November 19, 2014, 10:43 am

Check out the link I provided abover for Leets/Ubers to enter into a drawing. I'll give another first come first server soon in this thread, but further requests without me saying how many, if any, are available, won't be fulfilled, as I can't be giving out 20 servers a day for free. Stay tuned to this thread for more info as I release it to get your free server.
