Minecraft Premium account checker

I am vb.net beginner and this is one of my little projects with some WebClient and HttpWebRequests, etc..

Hope it will be useful for some people here.

For those not wanting to execute a project file;

Code Public Class Form1

Dim check As New System.Threading.Thread(AddressOf checker)

Public Sub checker()

For i = 0 To ListBox1.Items.Count - 1

ListBox1.SelectedIndex = i 'Causes CrossThreadCalls error

Dim s As String = New

System.Net.WebClient().DownloadString("https://minecraft.net/haspaid.jsp?user=" & ListBox1.SelectedItem)

If s.Contains("true") Then '<-- premium'

ListBox2.Items.Add(ListBox1.SelectedItem)

GoTo nextcheck '

Else

'<--failed'

End If

nextcheck:

Next i

End Sub

Private Sub Button2_Click(sender As Object, e As EventArgs)

Me.Close()

End Sub

Private Sub Form1_Load(sender As Object, e As EventArgs) Handles MyBase.Load

End Sub

Private Sub Button1_Click(sender As Object, e As EventArgs) Handles Button1.Click
Control.CheckForIllegalCrossThreadCalls = False 'Ignore CrossThreadCalls error
check.Start()

End Sub

```
Private Sub Button3_Click(sender As Object, e As EventArgs) Handles Button3.Click
    Dim load As New OpenFileDialog With { _
        .AddExtension = True, _
        .Filter = "txt files (*.txt)|*.txt", _
        .FilterIndex = 0, _
        .RestoreDirectory = True, _
        .InitialDirectory = My.Application.Info.DirectoryPath}
    If load.ShowDialog = Windows.Forms.DialogResult.OK Then
        ListBox1.Items.Clear()
        ListBox1.Items.AddRange(IO.File.ReadAllLines(load.FileName))
    End If
End Sub
```

```
Private Sub Button2_Click_1(sender As Object, e As EventArgs) Handles Button2.Click
    Me.Close()
End Sub
```

```
Private Sub Button4_Click(sender As Object, e As EventArgs) Handles Button4.Click
    Dim SetSave As SaveFileDialog = New SaveFileDialog
    Dim i As Integer
    SetSave.Title = "Export .txt"
    SetSave.Filter = ".txt File (*.txt)|*.txt"

    If SetSave.ShowDialog = Windows.Forms.DialogResult.OK Then
        Dim s As New IO.StreamWriter(SetSave.FileName, True)
        For i = 0 To ListBox2.Items.Count - 1
            s.WriteLine(ListBox2.Items.Item(i))
        Next
        s.Close()
    End If
End Sub
End Class
```

Bro! the code will be working but the program made from it would be not stable as the program can't handle huge passwords wordlists which will cause the app to freeze!

Huh?

All he is doing is checking if they have premium... No password lists needed.

He thinks it's an account bruteforcer as I see.

Actually, he has a point. When you are dealing with huge amount of data (importing/exporting) application should be multithreaded. Otherwise, the program will freeze/crash).

WhyWork - November 18, 2014, 8:15 pm

Here's another one that ByteBlast made:

<https://hackforums.net/showthread.php?tid=2200674>

I believe it's better because it shows how to use delegates in order to update the UI, instead of disabling the check for illegal cross threading (huge no-no)

Trig-Config-Maker - November 20, 2014, 5:42 pm

i wrote 1 myself from a thread last week someone asked for about a onlins single checker ive updated it since with cape check, skin grabber and a few more things but heres the original rough draft.

http://uppit.com/3elt9votp456/Mc_Multi_Checker.rar <-- yes its exe but also virustotal scann is below too

<https://www.virustotal.com/en/file/bb5b5c4c9fbe133fd9b60bcbf52ea2d92481e656e1f05013a4881981e7399b6e/analysis/1416533934/>

Mr. Cash - November 23, 2014, 1:31 am

Code Private Function isPremium(ByVal username As String)

Dim x As New Net.WebClient

Dim z As String = x.DownloadString("http://www.minecraft.net/haspaid.jsp?user=" & username)

If z.Contains("true") Then

Return True

Else

Return False

End If

End Function
