Thread: [\[Tutorial\] How to Spread Your RAT with Ms Office Exploit Full Tutorial | 100% Free](#)

Cyb3r D3v - November 17, 2014, 7:29 am

Hii Guyz Today i am going to Share tutorial on How to Spread Your any Virus/RAT/stealer/Keylogger/botnet etc with office exploits.

its easy to spread with office exploits as they aren't suspicious and every body easily trust and open it.

For this You need a Working Virus Fully tested.

lets Start on the main part :

Step 1 :

you will need a Webhost to Upload you Virus.exe i am using [Clickhere](#)

Step 2 :

Its Free you have to sign up and create a Free domain as i did .

after succesfully creating a free domain you click on hosting tab and click "switch" .

Step 3 :

Goto filemanager and Install filemanger.

Step 4 :

The open filemanger Right click and upload your virus file there

Step 5 :

right click on virus.exe and click getinfo and copy link

step 6 :

Main part i am providing with a MS office Macro exploit Download link its not FUD but still YOu can use it !

[DOWnload OFFICE exploit](#)

Step 7 :

It will be Detected by Antiviruses You better turn off ur Avs. If You dont Trust then u can use Vmware .

Step 8 :

open Exploit.doc and click on word options , Then Tick " Show Developers tab on ribbon"

Step you now see the developers tab click on it > then click on visual basic > then this document > and then you can paste the copied link that you get from webhost.

now save it you can put any Content you want to fool people you should use your own brain and Social engineering for that purpose .

Now When you Click it or victim will click it He will see a options tab on it you have to trap you victim Such that he click on it and enables the macro content Once HE Does that the Virus Gets Downloaded Behind Without any warning a And BOom!!!

Thank you fr Reading this Feel Free to comment Below If you have any Doubt!!

Wait, so the victim needs to enable the security macro thing for it to execute the RAT?

FormerlyS - November 18, 2014, 5:57 am

Good tutorial. Although this has existed for a while already it's still good for others that did not know this already.

it was coded by my friend ?

mcfaker - November 19, 2014, 9:37 am

What a nice friend you have that he gave it away to you for free, could you tell us who he is?

Frawshy - November 19, 2014, 9:56 am

Only problem with your exploit is that the code appears as a virus to any scanner so... there goes spreading.

????? ????? - November 19, 2014, 10:21 am

Nice tutorial keep-up the work mate .
