Thread: [I require some staff assistance for a matter of great importance.](#)

Hello,

Today I tried giving my good friend Understalker some reputation points because he did some personal favors for me and think he is a very nice guy and deserves them.

His profile is here: <https://hackforums.net/member.php?action=profile&uid=1726101>

When I click "Rate" nothing happens. I tried reloading and other viable options. I can rate other users but not him.

Thank you all for reading and have a marvelous day.

EDIT: PROBLEM SOLVED! I CAN NOW REP HIM! THANKS EVERYONE!!!!!!

Excuse me, I did not have the chance to rep you yet because I can't!
Hopefully a staff member can respond and assist me.

It's a personal message from Omni about Understalker.

?

Clear all browser caches, systems, etc.

If that doesn't work, switch browsers and see if it will allow you to.

I don't know, I just repped him perfectly fine. Try a different browser maybe?

Have you tried what I posted yet...?

Understalker - November 18, 2014, 1:52 pm

Seems like Omniscient made a bug in the system, my reputation seems to be negative.

Minor error, will be fixed within 24 hours.

Who do you mean? Is cookies and cache same thing? I am using Google Chrome and it says "clear cookies" should I do that?

Yes.

If that doesn't work after that, try to use Internet Explorer, or FireFox.
