Thread: [FUD Java Drive By](#)

Astronomiks - November 19, 2014, 12:52 pm

Soo I was hoping to start doing this soon. But I would like to pay someone to setup the driveby for me. I have the domain name, and the webhost already setup and a RAT already made. So all I need is someone to help me create the driveby page + applet. I'm willing to pay. if successful so it should be easy money for some of you.

Thanks!

Please post or PM me your skype because I cannot reply back to PMs until I have 25 posts.

Hi man,

I'm pretty sure JDB's / SJDB's don't really work anymore (only on very old versions of java, and people need to click "run anyway"). You can still get a kinda fud silverlight driveby tho (for about 10\$). There's also a great silent flash driveby being sold on this forum for about \$200. I believe the guy only sells a limited amount of copies tho.

Where can I find someone selling a silverlight driveby?
