Thread: [MoeTube - Watch your favorite anime shows with your friends](#)

Dragon. - November 19, 2014, 5:37 pm

Hey guys,

I decided to bring back this summer project of mine. Hopefully you guys can find use of it.

<http://www.moetube.net/>

(Powered by KissAnime)

Simply search for a show, find an episode number, and hit "watch with friends".

You should be good to go! :D

Sorry, no fancy thread design.

EDIT: Search system is temporarily down. Some screw up on KissAnime's site. Will fix it when I get home from school.

So it finally reached at this point, Dang good job Dragon-dono. The only thing you need to change now is change the theme to dark ones for vampires like me.

Man, it's been a while since I've heard from you. How've you been? :D

And don't worry Lyrlei-senpai. I plan to at one point. I need to shift my focus toward Nori though. I have an update planned for it that is set to (hopefully) release by mid-December (before Christmas). I hope you'll like it. :)

Btw, why aren't you in our Skype chat?

Oh that's nice, though other colors should be fine too- well atleast for me.

Well for the most part was studying and watching anime/reading manga.

I have bad internet nowadays that' even skype slows it down, i might turn it on tonight.

Don't know if it's just me but searching doesn't work. I get "No Results Found" no matter what I search for.

I noticed if you write the full name of the anime, it will show up as "No Results found". Search up a portion of the title and you'll get your results.

Edit: Never mind. Not getting any results right now. (What I said above was an issue with the old site)

Vegas - November 19, 2014, 6:43 pm

Can't currently look at it ; is it an anime variant of a sync'd viewing site?

Dragon. - November 20, 2014, 1:49 pm

Fixed the bug. Sorry guys. There was an issue with the webserver not making outbound requests properly.

Chitoge - November 20, 2014, 2:14 pm

drawbackK - November 24, 2014, 5:33 pm

Wait so does this let you watch the episode at the exact same time as your friends, is it supposed to be synchronized or something?

You should disable autoplay on videos in rooms, it's annoying to always pause and rewind before I send to friends.

You mean as the host, right?

There is a <3 second leniency, just so that it won't be lagging too badly for those who have a hard time keeping up with the host. I'll probably shorten this to a second or so.
