Thread: [Make me this gif? \(All Frames Included\) *Updated](#)

Chips Ahoy McCoy - November 19, 2014, 8:55 pm

So basically I just got done getting all of the frames for my GIF that I wanted to make and then realized that I had no idea how to make it. I was wondering if any of you could resize the frames to fit HF standards for signatures and animate it? If you're willing to take up the task here's the imgur library.

<https://imgur.com/a/P6Jsg> < New frames.

If you could also reverse the frames to make a sort of endless loop of the gif that'd be awesome. ?

CyberneticTitan - November 19, 2014, 8:57 pm

Making this GIF. Please give me 10 minutes or less.

Chips Ahoy McCoy - November 19, 2014, 8:58 pm

Really? thanks man I seriously appreciate it.

grady - November 19, 2014, 9:00 pm

I'll do it tomorrow if anyone hasn't already done it for you.

And if I'm not mistaken, this is from Sakurasou no Pet na Kanojo, correct?

I've been meaning to start that show.

Yeah it's from that show. It has been my #1 anime for some time now. I like how uplifting/lighthearted it is. The opening always seems to brighten up my day.

CyberneticTitan - November 19, 2014, 9:15 pm

Took a little longer than 10 :P I dropped every other frame to meet the file size limit.

Do you think you'd be able to reverse the animations to make the gif seem infinite?

CyberneticTitan - November 19, 2014, 9:20 pm

I'm not sure I understand what you're asking for haha.

Hmm, I'm not to certain on how to explain this. Like, you'd take the frames and play them back in the opposite order (32, 31, 30, etc.) to reverse the animation to make it look non-stop.

CyberneticTitan - November 19, 2014, 9:27 pm

Do you want me to start at frame 33 and play back to frame 1 or do you want me to start at frame 1, play to frame 33, and back to frame 1?

Chips Ahoy McCoy - November 19, 2014, 9:30 pm

1-33 and then 33-1. I'm not sure if the file size would be to large though. Is it possible to lower the size?

CyberneticTitan - November 19, 2014, 9:36 pm

So I had to cram twice the information into the same file size, so I had to remove a few frames.

Might look a little choppy:

Looks nice and smooth In my opinion
Dont think youll get better than this
So job considered done?

Chips Ahoy McCoy - November 19, 2014, 9:42 pm

Hmm, I had a thought. Would lowering the resolution of the frames solve some file-size issues? I'm thinking if I cut the frames in half (Remove the cats at the bottom etc.) that'd do the trick. Because what i'm trying to get is an endless loop of 1-33 and 33-1 without any missing frames.

You wouldn't be able to fit all 66 frames in there without adding lossy or heavily decreasing color. However removing the cats I will be able to fit another frame or two in there. (might look a little weird

because their tail is in the middle of the shot)

Chips Ahoy McCoy - November 19, 2014, 9:47 pm

I'll work on redoing the frames. I'm going to try to make it a bit different. I'll update the op as soon as possible.

I updated the op with new frames. I cut the parts that weren't necessary and sharpened the pixels up a bit. It should be a lot smaller. (22 frames.)

CyberneticTitan - November 19, 2014, 10:33 pm

There was no way I could fit all of those frames into there. Because you cut the bottom out, you now have more wide pixels which does take up more space.

This GIF has 35 colors and 40 lossy.

Edit 1:

Fixed the girl on the far right's clapping:

It's looking pretty good. I think that might be the best we're going to get it. I'm pretty happy with the results though. :) Thanks for your time man. you're a life saver.

Joaquín "El Chapo" Guzmán - November 19, 2014, 10:45 pm

I love how this blonde girl looks at that overexcited girl her face is like "Bitch what you so happy about?" :)
