Thread: [Smiting champions is the ultimate form of disrespect](#)

Title.

How do you feel about a subtle blue beam raining down on your champion at the speed of light from god knows where only to secure your death? Probably pretty fucking bad.

In fact I make it a point to ask in all chat how the player feels that I smited them.

444 - November 20, 2014, 11:40 pm

LOL indeed, I don't understand why they added that in.

Scarlett Johansson - November 20, 2014, 11:40 pm

I'm just finally happy riot made smite useful after like level 15 because at a certain point smiting minions or monsters did virtually shit when you powerful, so now that it acts as a slow with some damage makes the jungler even more valuable. Thanks rito.

Thanks rito.It was more useful in Season 3.

You got gold each time YOU smited.

Aliasllias - November 21, 2014, 2:02 am

To be honest it's really weird, but maybe I will get more used to it

420 Blaze It - November 21, 2014, 2:04 am

It makes it more useful than fking neutral monsters, waste of a spell.

Joaquín "El Chapo" Guzmán - November 21, 2014, 2:04 am

I think that the new items are really useless since i cant play udyr anymore..

The new FF like item works good on Udyr doesn't it?

I tried a few games of WW jungle and his sustain is unbelievably good.

eoNe - November 21, 2014, 5:10 am

I cant get used to i always forget to smite when someone have low hp xD.

Aceman - November 21, 2014, 10:34 am

It's going to take me some time to get used to but I think I'll be a fan of it eventually.

You're an idiot, Udyr and WW are broken at the moment. Devourer is better than Flare was on release... no trade offs, can gank as much as you want and you'll get it faster than farming, and once you do have it it stacks at least twice as fast.

Llema - November 21, 2014, 2:47 pm

Smite should be able to deal the full true damage amount to teemo.

Teemo got nerfed hard enough because of those crab things that walk up and down the river and can pop his shrooms.

What? They nerfed him again lol? Send me this from patch notes?

Aleksievggwp - November 21, 2014, 9:45 pm

Smitign champions is just a stupid idea.... 165 dmg at 18? 18 dmg at 1? well m8.. i think its more usefull to buy a single amp/long sword but not and this upgrade

It gives a slow to champions that wouldn't be able to gank without red buff before.

I.E. Shyvanna smites a champion and reduces their movespeed by 50% for 2 seconds, actually allowing her to gank without needing her ult.

If you use Warrior it marks them for 6 seconds, which allows you to see them, deal bonus true damage, and they also hit you 20% softer than before. It's great, you cray.

That's the devourer.

If you're new to the jungle try this.

Warwick, rush Skirmisher > devourer > CD boots > BotrK > wits end.

Go tanky with the rest, enjoy wombocombo'ing any adc/close to any midlaner and/or the jungler once you smite + ult and do 1 Q after ?

We're both wrong, I mean to say Skirmisher's Sabre.

It can be easily fixed by making crabs not pop shrooms, but idk if Riot cares about it.

Jordana Brewster - November 22, 2014, 1:57 pm

I'm really happy about the smite addition since it makes it useful later game when you're op enough to clear jungles without smiting

Mr. Corleone - November 22, 2014, 2:13 pm

It feels weird to use it on champions, but using the 'slowing smite' is pretty epic.

As evelynn no one can escape from me if I ult, W, Botrk, Smite on an enemy champion.

No one ever escaped me :3

Dr. Fritz - November 22, 2014, 2:15 pm

I fucking hate riot. Why do they have to change the game so much with those shitty items? I want Season 3 back.

Yea kinda true. Too much has changed in a weird way.

The game feels kinda uncomfortable but I kinda got used to it,

Raz3d - November 22, 2014, 2:16 pm

Will be pretty fun to use on champions, once I fully get used to it.

_wind - November 22, 2014, 9:20 pm

I think RiotLyte is going to enjoy these new changes ;)
