Thread: [\[DOX TUTORIAL\] ISP DOXING & SOCIAL ENGINEERING](#)

Inferiors - November 21, 2014, 1:22 am

In this tutorial I will be covering "Doxing", "Basic Social Engineering" and, "ISP Doxing". I would quickly like to apologize to anybody who has made a similar tutorial to this one and is offended by the making of this one. Thanks - Inferiors

Let's start with Basic Social Engineering. So, im guessing you have a target.. correct? Well first let's obtain some information.

One of my first step's is getting a email. If they have a Twitter, go to the login screen and click "Forgot Password" then input there twitter username. It will give something like this (aa***@****.).

Hopefully, they have a simple email where there username is it. EX : @Inferiors & There email is EX: In****@****.**.

We then go on to Pipl, a website used for looking up Emails, Names and more! Input the email, name or whatever you have on them and see what comes up. Something? Nothing? It may give you a lead, it may not.

Continue to Google they're Usernames & Emails. Its basically a game of lead's.. once you find a little piece of information you uncover LOTS more.

For the people who did not get a email off of there twitter, or there target just simply doesn't have a Twitter here's your next step's. I like to look for Youtube's and go on there Google Plus account, from there you can get there email and they might just have a name on there.

If you find a name take a go on either 411 or Whitepages. If they're not over the age limit (I believe it's 13+ but im not sure how quickly it updates) then you will be looking for a parent with the same last name.

If they don't have a common last name, it should be a lot easier to find something. If you think you have a lead of a parent but you're not 100% sure, look them up on Facebook. It's one of your best bet's. If you find a match go ahead and search through he/she's friends list and type in the same last name. If you know your targets full name this will be easy if not look for people around there age.

Websites (Can't put in Link form) | Pipl, Pastebin, ResolveThem, TrueCaller, 411, Whitepages, IpLocation, Facebook

Now that the basic's are down of simple Social Engineering/Doxing let's move on to a Format.

I like to write Dox's in Pastebin but use whatever you want!

My format of writing down somebody's Dox is below!

Victim's Name|
Facebook Link| (If they have one)
Address|

DOB|
Phone Number|

Mom's Name|
Facebook Link|
Address|
DOB|
Phone Number|

Dad's Name|
Facebook Link|
Address|
DOB|
Phone Number|

Victim's School| (If still in school)
School Address|
School District|
School Number|

Twitter| @
Skype's|
Emails|
AIM|

IP Address|
ISP|
DNS|
AS Number|

Pictures| (Pictures of Victim and or Family.)

This is my personal format and you do not have to use it but it's the way I like to keep things organized and a good example.

You can also add SSN's, Records and any other information you have on the Victim and there Family.

Now! On to ISP Doxing, this is probably the part everybody is curious about.
What's needed to ISP Dox? All you need is a IP Address which isn't to hard to come upon!

<http://www.hackforums.net/showthread.php?t=3896838>

Tutorial has been changed due to "Leeching" complaint. Take the spaces out.

Hopefully everybody has learned how to use Social Engineering and how to ISP Dox after reading this tutorial. Feel free to drop a follow on Twitter and Add on Skype for any questions or help with Doxing!

GOODLUCK! - INFERIORS?

fenrir - November 21, 2014, 11:09 am

Nice tutorial. I'm sure it will help some people. Another idea is spoofing your number/ calling through free phone apps.

?Criminal - November 21, 2014, 2:14 pm

Fucking leeching retard stop copy and pasting outdated tutorials from pastebin half of those tools are fake anyways cox does not use icon and polar, which is how I know you're a leeching idiot that doesn't even link sources.

Inferiors - November 21, 2014, 2:47 pm

The system's are from a thread in 2013 but the user's account is Closed. I will be deleting my section of the written Script & Sytem's and simply putting his link. But.. I am glad you took the time to say "Fucking leeching retard"! You made my day (:

fjohn01 - December 8, 2015, 11:31 pm

thanks for this i really learned something :)

BreadMaker - December 8, 2015, 11:36 pm

For the lazy people
