Thread: [Youtube Videos getting flagged instantly](#)

Nikos554 - November 22, 2014, 4:18 am

Here you can see one of my youtube videos for bringing traffic to my multi-niche website:(I can't post the link PM me to send you the youtube url)

Once I upload it gets a view after 3-5 minutes and then it gets flagged and goes down.(Regardless of the niche I show)

So far I have tried:

- 1)Clearing browser cache
- 2)Using Different computer
- 3)Using Different email
- 4)Changing my IP
- 5)Shrinking the links at the description(I have tried bit.ly [WARNING: potentially infected] and adf.ly)

Any suggestions?

Clearly you're getting caught trying to infect people, maybe try creating a new account.

Earn - November 22, 2014, 4:32 am

Text not putting the link in the description straight away. It could be because of that.

Nikos554 - November 22, 2014, 5:00 am

I am not trying to infect anybody,these are niches videos not RAT or anything else.
I put the link after 5-6 lines and always shrinked.In those lines there is text.

Try upload the video without the link & see what happens.

Someone flags them within the 5 mins,and I am sure about that because the following message appears:

The YouTube Community has flagged one or more of your videos as inappropriate. Once a video is flagged, it is reviewed by the YouTube Team against our Community Guidelines. Upon review, we have determined that the following video(s) contain content in violation of these guidelines, and have been disabled.

You should wait like a day before you add your link. If you want to do it right after you upload you have to send them to a website that has the download on it.
