Thread: [Hide Wordpress - No one can know you use Wordpress\[WP Plugin\] * Download Link Updated](#)

Basic - November 22, 2014, 10:10 pm

Hello people.

Today i want to share a Wordpress plugin to you.

As the title says it can make it happen so people cant see that you're using wordpress as a web platform.

All of you who use WordPress loves it, in some cases we prefer to hide the fact that we are using WordPress as platform for our business or non-profit.

Now are we really safe without? Almost every day is there new bugs found inside Wordpress plugins, themes and Wordpress for itself. So i think a plugin like this can be good for you to add to your Wordpress site, it also boost our security and it allows us to have more beautiful URLs and permalinks!

UPDATED DOWNLOAD LINK

28.02.2015

Press on link above to download it with NO PASSWORD

This plugins come from Themeforest, i do not take any responsibility if you get busted without paying for it. be safe!

English_Fire - November 23, 2014, 8:53 pm

And for anyone interested in paying the developer for their plugin:

<http://codecanyon.net/item/hide-my-wp-no-one-can-know-you-use-wordpress/4177158>

And another (very popular) free alternative with many of the same features + security enhancements: <https://wordpress.org/plugins/better-wp-security/>

There are benefits to using the free plugins or paying for the plugin - such as convenient automatic updates and support. Those poor developers on Code Canyon get raped even when people buy their plugins.

Can you send me the password?

TIA
