<https://hackforums.net/showthread.php?tid=4026575>

Anybody have already buy any of these 2 crypter and can help me to choose ?

(btw sorry for my bad english).

Pi_Rat - November 23, 2014, 4:56 am

Both are very good crypters ,,,is your choice what do you buy

Crypterx ReBorn

<https://hackforums.net/showthread.php?tid=4536552>

As you can see Cube Crypter lacks of options nesscary to keep the file alive. Crypter X reborn has

-Silent Startup

-Multi blinder (really good feature)

etc

Also what I found Cuber Crypter didnt have that Crypter X Reborn Had was USG
USG, basically USG is it creates a different output every time, causing longer FUD'ness

Yea bro go with my plan

iReFuSe2LoSe - November 23, 2014, 7:43 am

Personally,

I would recommend going with a C or C++ based crypter, they are hella and sometimes smaller FUD times but the amount of installs you can get is usually nice. Then again most computer run the .NET so I would use Crypter X

With does the multi binder feature do?

Victims opens file

(1st blinded file opens)

(2nd binded file opens)
then the rat.

Anyone else ?
(too shooooooooort).....

CRYPTEX. BY FAR. Way more features, KillaMuvz is really nice, the name is recognisable, custom coded, KillaMuvz is very active and there are so many features in Cryptex which makes it hard for antivirus companies to detect because they flag certain settings, but if you muck around enough you can bypass them. You can even alter the order of the stubs functions.

Cube crypter is currently having fud issues. Please avoid CC. Go with your other option.

Sh4DiX - November 24, 2014, 8:27 am

thanks ! i think i will buy cryptex reborn

Kill?Muvz - December 2, 2014, 4:57 am

Yeah you better buy CrypteX soon!
Next person to PM me with this post quoted will get any package 50% off.

getting 2/35 both eset and dr web. very good crypter :)

Alpaca Gang - March 10, 2015, 3:44 pm

Cryptex hands down. Its a great cryptor!

NerdNational - July 3, 2015, 12:25 am

If your not really into putting the monthly payments in I would say get byte crypter. they have a life time package what is amazing I have used them they are not 100% fud but have great reviews and is simple to use. I have only had 1 problem with it and that is right now "only started happening when I come off my vpn" it locked my license but it tells you how it is locked and how you might be able to get it back. it might not be a fud crypter but it is still one of the best I have used.

This is a very old thread. Please just let it die.
