Thread: [my mouse doesnt work randomly in certain usb ports](#)

?ă?ž?® - November 23, 2014, 6:01 am

Sometimes when i turn my computer on my mouse doesnt work in the current usb port and i have to unplug it and plug it back in or put it into another usb spot entirely for it to work. I think the drivers must be fucked up or something idk. How do i fix this. I have a cm storm inferno mouse and a cm storm trooper case. The usb ports do not malfunction with any other device btw.

What is your motherboard brand and model and what exact version of Windows are you running?

?ă?ž?® - November 23, 2014, 8:33 am

im running windows 7 ultimate 64 bit and my mobo is a asus p8z68 v pro my builds in my signature as well

Download and install these drivers :

http://dlcdnet.asus.com/pub/ASUS/misc/utils/Intel_Chipset_XPVistaWin7_V9301019.zip

http://dlcdnet.asus.com/pub/ASUS/misc/usb30/Asmedia_USB3_V11410_XPVistaWin7.zip

A restart will be required, do it.

No problem. And none of these updates were for your BIOS ?
