Looks pretty good. Thanks for this, 'Snorlax!

Cyber Saint - November 23, 2014, 9:31 am

Another fantastic userscript for 'Snorlax.

Nice work, my friend.

I fucking love you Snorlax.

Please continue making to awesomest scripts.

I will. I've reached the point, where I no longer can think about new userscripts. That's where you guys come in.

This is great, I've never spoken to you but with this and the verify token I love you.

:P

K?irito - November 23, 2014, 9:51 am

This is a really nice script, working so great, thank you snorlax!

If that's so, I have to hear Omni out. He closed my thread in The Empire's subforum last time.

Just changed one thing.

username = "WRITE AN ALIAS";
to
username = "WRITE_AN_ALIAS";

Suggestion: make it check if they have like Ub3r or Staff or any rank that can use it. If it's possible, great. If it's not, it's whatever. ?

What would that help with? So you can add them to a group or?

He means so the button only pops up if they are ub3r.
Well i think that is what he means.

Oh yeah true. I have to check a condition first then, which would mean I have to look if their post has the award.. and then I have to make it work for both HF (two different postbits styles).. well, too much work to be honest.

Roger Waters - November 23, 2014, 12:21 pm

May I suggest you have something right on their profile to add them?

I guess you're right. It'd be a lot for a userscript.

So instead of in the postbit, it will be right on their profile?

Yeah, I mean when I go to someone's profile, I would want to add them directly from there instead of finding a post to add them.

Yeah I agree. It was suggested to be in the postbit by Doctor Blue, so I just went with that. I'll update it for profile as well as add the verify secret thing on the profile.
