Please stop sending me messages about designed clothes... I do not know the answer.

I would like to know too, but im not looking to buy in bulk. So does anyone know a cheap place that sells in singles aswell?

10\$ would really be the minimum you could find in my opinion, 5\$ custom printed shirts for a small order (30-50) would get you either crappy quality of print + material or huge shipping delay. Out of curiosity, what's the site you currently found?

If you're aiming for around 50 shirts per design just go on alibaba

You should get around 3-5 (maybe 7\$) per shirt and usually supplier will ship to you for free. Note you'll probably get tagged by customs to pay duty though
