Thread: [XMPP Goodies - Quick add, verify secret, and more!](#)

'Snorlax - November 23, 2014, 1:11 pm

INSTALL URL: <https://puu.sh/d2RuT.user.js>

I recently made [\[Userscript\] Quick add members to XMPP \(ONE click\)](#) and [\[Userscript\] Get Verify Token](#)

I've now merged these into one userscript! After installing it, you just have to visit someone's profile and scroll down.

I plan on expanding once I get more features! These are very light weight, so there is no need for a disable feature.

For Firefox get [GreaseMonkey](#).

For Chrome get [TamperMonkey](#).

For other browsers: Get [Chrome](#).

AltKev - November 23, 2014, 1:13 pm

You have dope userscripts man, nice work.

I remember you made one to hide certain subforums after I made a thread bitching how stupid some were.

Cyrus - November 23, 2014, 1:19 pm

I installed it, thanks for another awesome script!

Eternal. - November 23, 2014, 1:25 pm

Very nice, thank you for the userscript.

Cyrus - November 23, 2014, 1:29 pm

Hope Omniscient implements this into the site rather than it being a userscript.

'Snorlax - November 23, 2014, 1:31 pm

I could see a lot of userscripts being implemented, but you won't really be needing this on stuff like mobiles. Unless you run XMPP on your phone of course.

But yeah I agree. It's a pretty big site feature.

kawaii - November 23, 2014, 1:39 pm

Good work Snorlax. Glad you're enjoying the service. :)

Oh boy I am. Pidgin is being a total cock, but it's definitely nice.

Great, drop me a message if you have any serious problems - marisa@hackforums.im :)

'Snorlax - November 23, 2014, 2:18 pm

Thanks for installing it, everyone! Please update the script as I've made a change in the security token (it was generating a wrong one).

'Snorlax - November 23, 2014, 2:30 pm

Another update is out. I fixed another issue I had.

Omniscient - November 23, 2014, 3:31 pm

Members won't honestly need this userscript for long. This will just be part of profiles and was already planned.

'Snorlax - November 23, 2014, 3:40 pm

Sweet! Some part of me make these userscript to push ideas out to you as well.

I'll keep adding features when either I or someone else comes up with one, but remove the ones you add of course.

'Snorlax - December 1, 2014, 2:22 pm

Seeing that this is now embedded into HF, there is no need for this anymore! Thanks a lot for installing and supporting me.

Got ideas for an userscript? Send me the idea in a PM. I'll give you credits if I release it.
