Proton! - November 24, 2014, 12:35 am

Looks nice, think I have seen this somewhere else though. Anyways, thanks for sharing :)!

Hawk HF - November 24, 2014, 8:48 am

Good release. Finally something productive in the .NET section.

I'll be taking a look at the encryption methods when I get a chance.

The leech is real

moon91 - November 24, 2014, 4:11 pm

thanks for sharing this! :)

keep posting stuff like this

taktaktak - November 24, 2014, 4:21 pm

Thanks for the post man this will be good to learn from! Also nice thread design.

The leech is real

The leech is always real in the .NET section.

I've had 500+ views on some of my themes on pastebin, but only a page or two of replies.

IAMNotHere - November 25, 2014, 6:43 am

Thanks. I will see, if these codes fit my needs in some of my projects.

Cheers and a good day!

Marwix - November 25, 2014, 11:25 am

Looks really neat, good work!

This is what we need on this section, more precise and well-made programs.

Alison Wonderland - November 25, 2014, 6:35 pm

If anyone wants or needs to know more about encryption methods
I dont know everything
But its my current field of study at the so I will be able to help some
Just PM me

The leech is real asf
cmon guys, at least say thanks not hard aye shit

mendaxx - November 26, 2014, 10:42 am

Good to understand how the encryption works

Thanks for sharing this code

Coolguyanon - November 27, 2014, 10:18 am

Wow, nice program, will use it! Thanks for the share!

Does it really matter if people spam "thanks" in the thread or just download the damn application
and try it out? Be grateful people care enough to even show some interest and download it.

Its more about the ratios, of people who give enough shits to
Take a second and be thankful for something someone put time into for no benefit unto themselves
together.

Like shit someone gives you free food you dont walk off with it aye
They dont get anything out of it
Least you can do is be courteous

guess I was just raised better soz xx
