Bompari - November 24, 2014, 11:31 am

So I dunno friends if you've heard about this new thing called and discovered by the New Jersey Scientific Academia but I think this is the new big thing now its called Real life prestige, basically its something you develop over your lifetime just inorder to lose it when you die so I'm not sure if youve heard about it before but you should definitely post what youu think about it okay folks?
