Today i'll release my website for public use! :)

This is a school project, and was coded 80% by me(Rest of the 20% goes to the jquery plugin developers :))

[Click Here to Visit Eazes!](#)

What is eazes?

Eazes is a random SoundCloud music generator :)

Basicly, you can add track links from Soundcloud to the Player Library's :)

There are currently 4 Mood types(Genres) Smoka, Chill, Psytrance, and Party! :)

You can define which list you wanna to put your track link into, and within 24 hours, i will add it to the library list :)

This website is still under development stage, and therefor it's only optimized for computer browsers(Safari,Chrome,and Firefox).. (No IOS or Android support) YET!

I will develop each day/week more and you will see development :)

Home Screen

Info Tab

Add Track Tab

Features:After each song finish, it renews to another song

Add Tracks

Generate song's after Mood Types

View Count's implemented (Yet not visible)

More Features is going to be visible on the website, in the future.

BugsThe song slider, is abit glitchy when trying to slide (Just keep trying, and it will succeed eventually :P)

No Mobile support.

Generate song's after Mood Types

Have to switch to Bootstrap, to make it smoother in the responsive part.

This will be AD-FREE for EVER!

And i hope that people is going to use it, when they are chilling, having a party, or when they just want to listen to something new.

"So Next time you ask yourself the question, what should i listen to?
Just think of Eazes! "

Any songs added will be listened by me, and eventually decided which mood type it belongs to.
Any feedback will be appreciated! :)

The idea is pretty genius, the site could be executed a bit better

Splendid - November 24, 2014, 7:53 pm

I will def use this when I'm high, I always look for places to stream random music to me, can't be fucked with old tracks.

Thanks bro, great site.

Thanks for the Feedback guys!! :)
I truly appreciate it! :)

You can also add tracks :)

Best regards Dániel :)

We are still online and more songs added!

EDIT:It should work on Phones, and ipad, but people have to manually start the songs, since IOS dosen't allow autoplay. (Bandwith issues)

NEXT UPDATE: Song search function. (Coming within 1 week) :)

Best regards Dániel :)
