Thread: [Is this site site sqli vulnerable ?](#)

Jtwa - November 24, 2014, 7:31 pm

Is this site sqli vulnerable? And what do you guys usually do if you want to target a specific site? If not, what would you recommend to find a vulnerability other than sqli?

No site is not vulnerable to sqli
35 Characters

Jtwa - November 25, 2014, 9:31 am

How would i go about finding the vulnerability?

SecureHatz - November 25, 2014, 11:39 am

you can use acunetix web program for search

Jtwa - December 2, 2014, 11:56 am

I just ran the software and the site is vulnerable to 74 cross site scripting urls

I'm reading a tutorial and I've tried inputting different alert messages

Here is the one I inputted which gave me a different result

```
</SCRIPT>"><SCRIPT>alert(String.fromCharCode(88,83,83))
```

Is the site vulnerable ?

Lamer - December 2, 2014, 10:26 pm

Post in web hacking section for XSS please :)

Jtwa - December 5, 2014, 6:49 am

Can a moderator move this thread to the XSS section? I can post a new thread if that cannot be done

Thanks in advance
