Thread: [\[TUT / THOUGHTS\] LITTLE EFFORT - LITTLE EARNINGS](#)

Azraelstear - November 25, 2014, 9:29 am

There are tons of newbies asking others to reveal their methods.

(if you're too lazy, jump to bottom of this post. But you will still won't earn cause you're lazy)

Why would they do that?

OK. For the first time, I'm not going to be cock.

1. Is this your first time connected to internet?
2. Guess what advertisers pay for? Visitors
 - 2a) What is needed? Visitors
 - 2b) What to do with visitors? Monetize them.

So how to get visitors (it's called traffic)?

Ever heard about Reddit? 4Chan? Youtube? Pinterest? Xvideos? Xhamster?

Submit content.

How to monetize them?

- Pay per click advertisement network targeting your traffic with relevant ads

AdSense, Bitvertiser,

- Affiliate networks - networks that reward you for exact sales you generate for advertiser or leads (CPA - form filling ..., phone call)

- Adult affiliate networks - paid content websites like Met-Art, Femjoy that pay part of sales (50% revshare - also for monthly rebills) or static payment PER SALE 50-100\$.

CPA - (cost per action) basically pure PER ACTION networks that focus on simple tasks, e-mail registration, paid SMS, ... rather than real goods/services sales.

Pay per download, pay per install, pay per view, these are usually networks that PAY you part of their profit so you actually don't bother with direct monetization.

Simple small effort, low knowledge and low revenue examples:

METHOD No.1.

download 500 HQ uncensored hentai PICS, download software and watermark it with with URL to your site (domain+hosting is recommended).

On your site, have few Hentai affiliate program banners (Google them)

Now you have 500 uncensored hentai pics with watermarks.

Go to 4chan.org and upload pic in Hentai category. After a while, your picture will drop to page 2, then reply to your picture with another picture from your gallery.

This way you'll keep it at top posts and receive significant FREE traffic.

Post like 15 pics, let the thread slowly disappear out of sight and after few hours, make another similar. This way you won't get banned that fast.

And as this traffic goes to your site/landing page, from time to time someone purchase paid membership from Adult affiliate website and you'll earn 50\$ or even more.

That's it

METHOD No. 2

Same as method No. 1., just use Google and common sense to find good traffic source and make some testing what monetization works best.

You see only 1 method in this thread and lot of worthless talking.

And I see almost unlimited number of methods HERE. Because I don't expect someone to give me any method. I SEARCH FOR OWN METHODS.

4chan is great for traffic, but the traffic can be LQ as fuck.

If someone need an explanation what aff network and PPC are, I doubt those folks will make any money in the near future. To get the grasp of the Internet marketing and start executing the basics a beginner needs to invest a lot of time and some cash in learning how to things are done in that industry.

It's HQ traffic is some way and LQ in other.

4chan visitors are

1. quite skilled when it comes to IT & internet, online shopping ...
2. but many are still young and quite easy to fool

But it's not that easy to convert them because they are smart and skilled enough to get content by themselves, copyrighted content without paying ... and not going to purchase goods without doing research if they can get it cheaper.

But it's huge volume of traffic and even if admins for round the clock to fight spam, it's still possible.

Also 4chan is example, some people spam torrent sites with comments, some do blog spam, some spam with stolen FB accounts

Some spam YTwith comments, some upload tons of junk videos with watermarks ...
