Thread: [\[Method\] Get a ton of Leads for E-Whoring | Free Video Guide](#)

The Slug - November 25, 2014, 5:48 pm

Hey HF'ers,

So I was thinking about only sharing this method with some of my friends or even turning this method into an ebook or something and selling it, but then i thought F it i'll just share this with the HF community for free.

I've learned a lot from this site and it's time to share something with all you guys ?

This is my Free Method that I personally use and have helped many of my friends with that generates a ton of ewhoring leads.

You can use this method in many many ways so use your out-of-the-box thinking skills to come up with some powerful tweaks to this method.

For anyone wondering how I convert my leads I get people to sign up to dating offers via my affiliate link. Check out <http://viceoffers.com> They love ewhoring traffic and always pay me on time! Tell them TheSlug sent you! They pay me \$55+ per trial signup. Screw using Paypal and Amazon or selling picture packs

In this specific video I will show you how to generate a ton of ewhoring leads to your skype account. Please watch the entire video and then read the rest of this post ?

Make sure to watch video in 720p

The Video Above Explains the Method but the Video Below Shows you How to use the new TEAR v2.0.8

Try TEAR Free Today: <http://totalemailautoresponder.com>

I beg you guys to please watch the entire video before posting any questions because it hopefully answers everything.

Update: TEAR got a new update a few days ago so I will be remaking this video. Be sure to come back in a day or 2

Update2: I have added the updated video to use TEAR v2.0.8 under the original video! Enjoy mates!

Give me some Feedback Boys & Girls!

If you have any of your own ideas i'de love you to share how you would tweak this method. Maybe instead of getting people to add you on skype get them to add you on fb or whatever other chat tools you might like to use

Let's get some engaging conversations here! ?

I would super appreciate anyone that positively tries to contribute to this thread instead of using this method and moving on in silence.

Additional Tips: (I'll keep adding more here as thread develops)

1. Mandrillapp will ban you somewhat easily so spin text more than i did in this video
2. When using scraped email leads try to only hit main providers like gmail/yahoo/hotmail/etc.. to get rid of support and website emails. (helps my bounce/spam complaint rates)
3. If your getting the "account not available" error in the smtp log be sure to make sure "Any Smtplib Account" is checked on the templates page =)
4. If you are having problems connecting your smtp account try different ports like: 587, 80, 8080, 25, 2525. Think google uses 465

FREE BONUS:

To the first 20 people that post something productive and useful on this thread that can help other members out will receive 2000 email leads that I have acquired in the past week from ads i've posting on dating sites. These are 100% legit emails and convert super hot. I spent around \$220 acquiring these leads. ?

They have only been hit with a PPL offer once I sent via email. They should easily add your skype as shown in this method

Update:

To everyone that was having issues running the smtp check it seemed like it was a issue with a certain windows version issue.

TEAR just released a update that fixed the issues some of you were having.

Just make sure you have a 3.5 Net Framework or higher.

D.H.S - November 25, 2014, 6:07 pm

This is a free guide, yet paid e-books are complete garbage.

Thanks for not making this bad ass guide a paid e-book, you're helping me and many other :)

Wow op great share, personally I struggle finding methods that are actually genuine and actually help, (especially with trafficking). This video is very beneficial for new beginners who simply do not how to SE (Social engineer)

with a ton of guys adding you, you have time to practice (if you'd like to call it "practice") on different men.

I hope everyone using this get's a lot of traffic and generate big bucks.

Chemical Warfare - November 25, 2014, 6:33 pm

another possible way to avoid spam is putting " www(dot)blahblah(dot)com" <-- not sure if that would work but would be worth a try. overall i think this is a great guide

Factørial - November 25, 2014, 8:01 pm

OP gave me 2K HQ leads, im ready for you perverts [;

The Dragon of the West - November 25, 2014, 8:12 pm

Sweet that is a very good tutorial thanks for the info OP.

dede110 - November 25, 2014, 10:00 pm

hey OP thanks in advance,

you made the video unnessary long by just pausing and doing nothing so i got a little frustrated and

skipped so sorry if i misse something.

your method seems solid in theory, mass emailing ur skype name, when ur skype recently has been banning accounts for mass adding, i've add countless accounts getting banned with less than 50 contacts in them.id like to know how many skype ads do u get daily with how much emails u send.

Surprisingly I haven't had to deal with much account banning. If skype isn't cutting it for you maybe try another alternative. Plenty of ways to chat w/ ppl these days ?

find a dating website, create a profile w/email in the description. Tell them to send you an email because you respond faster via email. capture emails save to a .txt file.

Hey mate thanks for noticing heh but that's ok that's an old work email anyways. I wasn't too concerned about hiding it. I probably didn't need to hide all the info I did but I like to keep it as anonymous as possible.

I still have 2 spots open to get 2k email leads for free. They are super responsive so post here if ya want them!

mackmall - November 28, 2014, 6:42 am

If you still have those 2k email leads I'd like to get them. Thanks in advance and thanks for the method

Posting here so I can see this when I get home from school. Will edit this post.

mackmall - December 3, 2014, 1:32 pm

Just got the 2k leads for OP and got TEAR up and ready to go. Thanks Slug for the leads and also

for the help in getting TEAR up and running. I've used a lot of different mailers and autoresponders before and so far this one is as good as or better than the others I've used. Hopefully it generates some leads to my skype for me.

Thanks again OP

stanodamano - December 3, 2014, 6:57 pm

Great Video! I'm new to this and it has helped me out a lot! Anyone know how I can convert leads that hit me up on Skype?

insider22 - January 31, 2015, 1:33 pm

A lot of new versions since this video. Software is more easy to use now and set this campaign up.

creepez - January 31, 2015, 1:54 pm

Hmm seems like a good method and i thinked of some good twits.

Are you still giving free email leads ?

Thank you

The Slug - February 1, 2015, 5:00 pm

@creepez

Yea mate shoot me a PM. TEAR put out a new update a few days ago so the video is a little irrelevant now. I will make a new one this week so be sure to come back and check it out

I just put up the new video mate! I think you're going to love it!

I'm making an absolute killing right now I can't even begin to explain. And since making this post a few months ago I found the network <http://viceoffers.com> that has boosted my earning 20times higher than it was before.

They are paying \$55+ for a free trial signup. It's just mind blowing. Already bought myself a supercharged rangerover. MONEY IN THE BANK

Regulus - March 25, 2015, 8:48 pm

Hmm seems kinda promising to be honest. Might try this out hehe :)

SIM-888979 - March 25, 2015, 10:14 pm

Honestly just looks like a fake network. I don't see any form of proof or registration of ViceOffers being an actual company. Not to mention, look at the domain's WHOIS:

Updated Date: 17-mar-2015

Creation Date: 17-mar-2015

Expiration Date: 17-mar-2016

LOL, just registered a week ago. It's even hidden under Privacy Protect which is a big nono. I wouldn't trust this shit.

ViceOffers is a new network. Before it's just been the backend with a few affiliates, but they just recently created the site for public signups. Nothing wrong with that.

If you don't trust it don't sign up. Wait a few weeks until people start talking about it and u'll see it's legit. I've been paid out by these guys every time.

I met two of the owners last week in miami and it was a blast! Just because someone has ID protect on their site doesn't mean anything lol They got a lot of guys working hard on it right now. Check it again in a few days and u'll see how much work they are putting into it. Their whole site is getting a super sick makeover

You're nothing but a shrill dude. Why would anyone use this instead of Crak or MobIdea which have been legit since Day 1? You posted 0 proof of payments, and this "network" isn't even legally registered.

???vap0ur - March 26, 2015, 5:36 am

Wait, do you sign up for Affilate or Advertiser?

amanitin - March 26, 2015, 5:42 am

Watched the video. Thanks for sharing this, but to be more specific, it's not actually a method to get new leads. Just a middle step to get your own leads quickly and efficiently to either to skype/kik/to another email where you can convert them to paying customers. You still need to get the actual leads, which is something I'm still struggling with. I get alright traffic from chatrooms, but I know I could get TONS more, just haven't found a sustainable way yet. I can also convert them easily... just getting those fresh massive amounts of emails is the hard part imo (something you said is easy in your video and didn't go into detail about)

Regulus - March 26, 2015, 6:19 am

I'm still curious if someone has actually used this network and confirm it works. Otherwise I'll wait a few weeks to see how the feedback looks regarding this network.

Would be awesome to see some kind of Payment proofs as well.

I'll post some of my earnings later after the day is done. But i'm getting good #'s. My buddy is doing a lot better than me. I'll have him answer some of your questions regarding the network. I sent him the link to this thread so we'll see when he posts something.

If I have some time tonight i'll make another video showing everything inside the dashboard and my earnings. But i'm going out to drink with some buddies in a hour so that might have to be put off until tomorrow ?

insider22 - March 26, 2015, 4:00 pm

idk what all the fuss is about..

The video method is sick and the network is pretty badass. They got all the offers you need for this niche.

I just switched some traffic over to VO since their p/o is higher than the main offer site and I asked my other affiliate network managers about the owners. The guys are legit and have been pushing dating traffic for over 5 years they just opened their own Network that's all.

PM me for w4m leads, seems like you guys have issues there.
And stop complain' about a network you never pushed, it's child's play.
