Thread: [\[C#\] Junk Code Generator \[HOT!\]](#)

ubbelol - June 2, 2010, 10:27 am

Hey, i saw some Junk code gens for vb6 n' stuff but i haven't seen one for .NET.. So i decided to scramble one up for you guys quickly :D

Here it is, working quite well.. Might still be some bugs since i coded it quick and its still in beta. The actual program itself is coded in C#, 100% by me. In the first version (beta) i just added random calculations as junk code, but it does the job fine

Screenshot:

Here is download link for exe:

<http://www.multiupload.com/4TTM2IP2OB>

Give feedback and comments please! If people are interested i might release source and keep updating the program.

No problems mate! :) I'm happy to make you happy ;p

StRaXxD - June 2, 2010, 10:37 am

It works great...Added to my collection...

You should add button like "Copy"...

Mate, right click the textbox ;)

StRaXxD - *June 2, 2010, 10:41 am*

ohhh i failed....Sorry for retarded comments... ^ _ ^

Didn't tried right click...lol
