Thread: [BASIC Java Teacher \(Answer questions and watch me\)](#)

IAmMacman - November 26, 2014, 12:47 pm

Hey there, I am in need of someone that is willing to one on one with me on skype and watch me do my assignment. I need someone for around 30 minutes to just point out what I am doing wrong and answer basic questions. I would think about paying some money but I don't know if I can offer money in this thread so for now, I will leave it at that. If you are willing to help me, send me a PM!

What I need you to know:

- Basic Arrays
- Basic Class and Method creation
- Loops
- If statements
