Thread: [\[Tutorial\]How to E-Whore the right way!](#)

Bubbles. - November 26, 2014, 4:02 pm

#1 Choosing your Method

There are plenty of ways to E-Whore, KiK, Skype, Dating sites, and many more. Some of them are public and some of them are not. I'm going to be going over 2 of the ways listed KiK, and Skype. I personally like to use the KiK method just because it's easier to navigate through and I can get a lot of traffic on it. Feel free to chose which one you think you'll like the best.

#2 Staying anonymous

When E-Whoring it is always best to be on the safe side and make sure you're behind a VPN/proxy. I'd also recommend signing up for your paypal account on the VPN just in case you do get IP-banned from paypal. If you are not sure which VPNs to use that are free/paid I will give a list that I like the best down below.

Free

[\[censored\] VPN](#)

[Hotspot Shield](#)

[proXPN VPN](#)

[SpotFlux VPN](#)

Paid

[Ra4w VPN](#)

[143 VPN](#)

[IP Vanish](#)

[VPN Unlimited](#)

All of these VPNs have a user-friendly UI so it shouldn't be trouble setting up. Once you have your VPN set up you are free to continue on to the next step.

#3 Paypal Setup

Before going to Paypals website be sure to have your VPN on. If you're ok with some fee's make a Canada Paypal. If you don't like fees and you live in the US just make a regular Paypal. Canada Paypals can hold more money before being limited and U.S. Paypals have a lower limit before being limited.

[Canada Paypal](#)

[U.S. Paypal](#)

Follow the sign up sheet then continue on to the next step of the tutorial.

#4 Picture Packs

You're going to need a picture pack/video pack if you're going to be convincing creepers you're a real girl. There are MANY links for them on HF, but I'll be providing you the packs just to save you all some trouble and having to dig deep. Note even the most saturated picture packs work. I've convinced a guy to buy the same pictures 2 times Those horny guys will buy anything if you talk to them well enough.

#5 KiK Setup

If you're new to KiK E-Whoring and you don't already have bluestacks you can download it [Here](#). Bluestacks is a android simulator so you basically can play any game on android phones that you want. This is how we're going to be using KiK to get our money from our customers. Once you have Bluestacks installed got to the app store and search for "Fake Camera" and it should show up as a tiny little camera picture. The first one Install it and then head over to [this](#) thread and follow instructions on how to get an older version of KiK on bluestacks since fake camera won't work on the newest version. Fake Camera will allow us to send pictures from our gallery and make it look like we sent it as a "live picture" so this is pretty important if a customer asks for "live pictures." To send a picture to your victim click the little plus button at the bottom left of

bluestacks, click "Camera," then "Fake Camera," and click "Choose from windows," then navigate to where you downloaded the pictures and send.

That's all there is setting up KiK for E-Whoring.

#6 Skype Setup

Once again you're going to need your VPN for signing up for a skype account. Head over to skype's website [here](#) and click "signup." Once you have signed in on your skype account add a profile picture and a mood saying something like "Looking for people to talk to hmu." That's just an example of what to say be creative :) Also you'll be getting a lot of people adding you so I recommend using the search feature and look for some skype bots that auto accept people to make your life easier. When people want you to send a "preview picture" just drag and drop the picture in the chat. If he asks you to call say "I don't have money to buy a mic." that should save you from that.

That's all for the Skype setup part of the Tutorial

#7 Getting them to Pay

Getting your victim to pay is probably the hardest part of E-Whoring. There are many ways about getting them to pay and I'll go over 2 of them. Both have a chance of working, just gotta find the right guy who is stupid enough.

Method 1: Method one is going with the "Straight up" approach. When advertising you'll be saying you're selling pictures of yourself for any reason. Most people put "Selling pictures of myself for college funds." That's probably the most saturated way to get it but it still works on some guys surprisingly. Put in your add "Serious buyers only" so they know that you're selling. Remember YOU control the conversation, don't let the guy control the conversation. If you want to know something about him ask, don't be shy to get personal with him. While talking to the guys act like a girl. Say things like "Heyy", "Hai", "yassss" < idfk why girls say that shit "oki" and some smiles. Almost every girl I've talked to has texted like that. If you have a girl to talk to ask them to help you practice your girl texting :P This will make you seem more realistic while talking so they don't think you're some guy trying to get money.

Method 2: Method two is going to using the "sob story" approach. Once you go to advertise say something like "looking for older men to talk to, feeling sad." Once they ask you what's wrong give them a sad story of any kind. I'm not gonna post one just because people will call me out for making that up... Slowly talk them into paying you for your sob story. Remember to keep acting like a girl, never give up your role as a chick while E-Whoring. Like I said above, the methods won't work 100% of the time, so keep trying and talk to multiple people at once.

Once they want to buy from you send them your Paypal email address and bam you just made your first payment. Send the amount of pictures they paid for to their email, then move on.

Conclusion

I would like to say thanks for reading my E-Whoring tutorial, it took me many hours to type up. If you have any questions that I didn't cover in my thread please feel free to PM me on HF with any help you need and I'll try my best to answer your questions. Also if there is anything you would like me to add to this tutorial PM me and I'll think about adding it. I hope this helped you get started with E-Whoring and you get your first earnings from this TuT.

Happy Ewhoring

i mean any VPN based in america can very easily be compromised if need be, it's harder but still possible if it's based elsewhere

Its probably not HQ enough to be Stickied. I'm going to be updating it with more methods after I test them out, and can explain them better.

There are ways to add more verification to it. I'm not going to say how because it isn't allowed to be spoken of on HF. Google it though, I'm sure it'll pop up for you. ?
