Are you fucking kidding me. Look at the code, there is no possible way to make it shorter doing what I did. >_> If you want to say something like that, PROVE IT. Nuf said.

You said prove it, he did. He never claimed it as his own, or said that he made it. Why must you troll and flame? And why do you want my source if you can code something like this?

it was implied he should have done his own movable and RESIZING bordless form code. Not simply copy paste the IMAGE the op posted as the thread.

I don't care about your source now that you want to be a blatant troll. Please do not this thread unless you have something useful to say. Thank you.
