yeah my kaspersky too sees it as malware man but because for the downloader i used a public source, in the premium version the downloader function is encrypted and the whole builder is FUD

bozboz - November 27, 2014, 11:52 am

yeah its free but has some restrictions as i said :)

**Olethea** - January 2, 2015, 1:46 pm

Yay, free samples!

Anyways, I think it might be worth mentioning that the builder requires .NET 4.0.3 (at the very least?). Most people on this forum have this or better on their personal machines, I'm sure.

**CartWright64** - January 2, 2015, 2:06 pm

If you need a crypter, you can try mine, it's free and open source :)
