Thread: [osu! Spin](#)

PapaBeans - November 27, 2014, 1:07 pm

I recently started playing osu! and my mouse is dying. So I decided to create a program that will spin in a circle for me. In 1920x1080 I can get up to 477 (max) spins with the default settings.

As you can see it is fully customizable, and the positions default to the middle of your screen. Some feedback would be nice. I posted this in the gaming section, but figured it would generate more feedback here.

Press CTRL to use.

Nice, can you release the source? Seems very useful.

LOL, that was kew! I wonder why I haven't thought of that b4, and I do indeed play osu!
Great share haha :)!

osu!'s cheat system is pretty good, this will most likely get you banned pretty quick lol.
