Thread: [EXPLOIT! How To Bypass Minecraft Security Questions And Change Password!](#)

MultiExpress - November 27, 2014, 2:45 pm

Hi guys, this is the only way and the first way to do this.

Note: This doesn't work for every account and there is about a 50% chance this will work for an account that this method works with...

Also this is gonna be HUGE! All minecraft accounts that are being provided here on leak for free is because of the excruciatingly low possibility of changing the given minecraft accounts because of Minecraft/Mojang/Microsofts security question system...

BUT, I found a way to easily guess most accounts security question answers... So here it is... a step by step guide!

Step 1: Get a few Minecraft accounts with valid email and passwords.

Step 2: Go to <http://Minecraft.net/Login> and login to any account.

Step 3: You will get a page showing a security question you must answer this to continue.

Step 4: But like you and me we don't know the answer but I will show you a way to get a easy question to answer in a few tries.

Step 5: All accounts have 3 questions no matter what so keep CTRL+R until you see what all 3 questions are asking.

Step 6: Asking like favorite restaurant and stuff we obviously wont even have 2% chance of finding out the answer.

Step 7: But if you keep reloading the page to eventually see what all 3 questions are, if one of them is First Game Console then your in luck!

Step 8: You have the highest chance of cracking this easy security question more than the others.

Step 9: I have done this with 2 accounts and I successfully cracked there 2 First Game Console question.

Step 10: Strange enough, the two accounts had an extremely similar answers and I know why... The answers were "nintendods" and then "nintendo".

Step 11: You should try to guess the answer using the most famous consoles around the time 2011 - 2013 cause thats when the most popular game consoles were being played.

Step 12: So you only get around 5 - 7 tries of answering it on each IP/Proxy so once you get a message saying too many failed attempts change your proxy and your ip I recommend a VPN.

Step 13: So I recommend trying these guesses before messing around with caps and/or spaces: "nintendo", "nintendods", "playstation", "xbox", "playstation 3", "xbox 360".

Step 14: if all of them fail I recommend you to try messing around with spaces e.t.c and you will have a chance of getting it.

Step 15: Most people will think this method is just a guessing game but trust me it's not really because you have a better chance of crackign that question rather than e.g. First School Name, MAiden Names, Favourite Hobby, Restaurant e.t.c in fact it's really the only crackable question.

Step 16: If theres any problems e.t.c please comment below on the Leakforums page or PM me and I will help you crack it because i had 2 accounts 2 of them had the question and I successfully did it twice.

GreyStrills - November 27, 2014, 3:15 pm

So once you have passed this question you can modify the password from the site and then log in

on it?

xAttack - November 27, 2014, 8:35 pm

"All minecraft accounts that are being provided here on leak"

Erm.. Copy/Paste much?

SIM-2059193 - November 27, 2014, 8:36 pm

this isnt an exploit or a bypass at all :/
its just educated guessing

dg sdfhfgdfgdsfgdsgdsgdsgdsgdsgdsbro don't gravedig 6 month old threads.

dopepizza - June 5, 2015, 8:39 am

okay,
first off all this isn't a bypass/ exploit.
second of all, when you change the email (that is important) you have to answer all three of the security questions...

farux - June 5, 2015, 10:24 am

haha such a dead thread. Not sure why it got brought back up

yeah, no exploit here at all

Charizarde - June 6, 2015, 5:55 pm

It's not a fucking exploit.

th8a - August 13, 2019, 8:48 am

? This isn't hacking/exploiting. You're only making a guess...

Beyondo - March 30, 2020, 7:56 am

Doesn't work now because they'll provide you with the 3 questions at once and you have to answer them all so if you failed to answer any, it'll tell you that there's at least 1 answer wrong, which means you may have answered one question wrong, maybe two, maybe the whole thing was answered incorrectly and you won't even know.
