Today you are going to change your life

Wel Today i am going to tell you what to do you are not going to facebook and eat pizza behind your computer. NO!! its time for you to stand up and look in the mirror and look at your self you are probably fat poor and Don't know what to do? Well i am going to help you man i came here just to help you. First you Scroll through this section and download a couple methods as this section is growing everyday everyday new methods will be here. And yes these are saturated but what do you think? You will make \$\$ by doing Nothing? Well then you are wrong you will never ever make money when doing nothing as everything needs input to generate output for example a car needs gas in order to run without Gas no running car. Simple and i don't ask you to invest money to it no simple invest some time in it every time you check your facebook page everytime you check your instagram page could be time you could spend on making money!! I don't say you cant use facebook or instagram even with your passion for social media can make you money for example CPA,PPD,PPI,PPC you can make 100s a day by doing what you normal do but you just have to think out of the box that is all you need to know man and i am not here to say you are lazy i am here to help you so get of your ass and start working!! Thats i want to say to all people who don't know how to start or what to do.

Cool to see a motivational thread. It's true if you want to make money stop being lazy and actual try. If you don't at least attempt to make something of yourself you'll always be adequate.

Well if there was motivation shit enough in the world why are you reading this then? If you are just here to trash other people their thread then please do it somewhere else! Because there are people who actual willing to make money instead of making dumb and childish reactions.
