Thread: [How the hell do you get unbanned from pof?](#)

thegreat23 - November 28, 2014, 6:07 pm

I keep getting banned from pof after 3 hours . I use the same pictures but resize and under a different name. I clear my cookies, use a vpn, and Java is disabled on the browser. I use to make it like a month on there before I got banned after I disabled java script. If I used my phone and used data instead of connecting to a wifi network would that be my best bet?

Try to rename the picture pack and change them up. See if that helps and use a VPN
