After a painstaking amount of editing, I finally finished my 1 deag montage that a few friends and I made.

[Video: <https://www.youtube.com/watch?v=AmfcOmHelXU>]

Tell me what you think! Also tell me if you want to see more of these!

Good job man, I liked it.

Must have been a pain in the ass to record and set together tho.

Nice clips, decent editing, good song :)

Make more!

use a soundpack instead of ingame audio. it sounds so much better and smoother.

What are the crosshair settings that you have in the video?

justskills1 - November 29, 2014, 4:25 am

really decent video ^^ crosshair settings?

Great clips, but seems a little boring. The song is what makes it the worst, and will turn a lot of people off. The beginning is very boring, and almost made me want to exit, but I didn't. Later on the video is very boring because it is kill, after kill, after kill... You need some feeds or something. When people watch montages they want to see something they can't do, and to be honest it isn't that hard to one deag. You just keep showing clip after clip of a one deag kill. You need to add some feeds, or longer more interesting clips.

This is the comment that Im looking for. It was more of a montage parody than an actual montage. I really appreciate this advice because it will help me with future montages.
