Thread: [\[Guide\] Starting a Successful online Business \[No Post to PM\]](#)

Aeolus - November 29, 2014, 7:47 am

Nowadays a Money has become a great need of humans, Nowadays people are judged by how much they earn. They have became slaves in chase of money, but they do not know how to make money chase them, Nor they are known to the strategies of marketing. Its shocking that people who work 12 hours in Stores earn less then the people who work just 2-3 hours on their Computer.

THEY DO NOT KNOW:-

1. How to Earn
2. Which Method/Website to choose
3. Where to invest their Time/Money
4. How marketing Actually works

So Lets Start the guide of starting a online business...

1. FINDING A SKILL IN OURSELVES:-

This is the step towards planning a successful online business. Firstly we should take a look in our selves in finding a skill in our selves as everyone in this world has atleast one hidden skill in himself which makes him different from others. The skill can be anything including gaming, graphic designing, writing, coding, etc.

2. SEARCHING FOR WEBSITES WHICH MATCHES WITH YOUR SKILLS:-

Once we have find a skill in ourselves then we should search for a website where they can use their skills. We can start a business which matches with our skills, such as if we are a good gamer then we can play CS:GO matches collect items and sell them, we can sell some graphics , can code tools and sell them etc.

2.1. SOME MONEY MAKING WEBSITES:-

Here are some sites where u can make easy bucks online..

Freelancer:- A successful website where we can give and take jobs. Here we can give/find every type of jobs including Graphic designing , Writing , Coding etc.

Blogger:- A website from Google where we can make our own blogs , And earn bucks by advertising.

Adf.ly/Adfocus:-Here you can short links and earn money when people open the shorted links and click on skip button.

Youtube:- Here you can earn money when people watch your videos.

File Ice:- Here you upload your file, earn 1.5\$ if anyone does a survey for downloading that file.

3. DARK MARKETING:-

This part contains the real meaning of marketing. Marketing is not that much easy as people think. Nowadays only 20% of marketing products are not fake. Have you seen products such as facebook hackers , Gmail Crackers on youtube and google? You might have believed on them, and struggled

a lot for getting them by doing surveys when you were 12 years old, and at age of 15 you came to know that these were fake. This is how actually marketing works.

4. TAKING ADVANTAGE OF THE CHANCE:-

While marketing you should know that how to make advantage of a chance. For example suppose you have a video on youtube which is getting millions of views, Also if your video has external links then u can short the links with Adf.ly so you could earn some more bucks when people click on your links. Suppose 50k people clicked on the links then you could earn something like \$500 (i know that its less but why will u leave the chance of it)..

5. NEVER GET SCAMMED:-

You may have seen that there are many websites which do certain promises but never fulfill it. These are the scammer websites. We should never invest our money on untrustful websites. Only we should invest our money on trustful, trademarked websites which are never reported in any scam reports, And should properly investigate the website before investing our time/money on it..

Good Luck making the bucks.?

Feel free to Post to Keep the thread alive!

sonex - November 29, 2014, 7:56 am

Good looking guide. Thank you for your contribution!

Sedo - November 29, 2014, 9:10 am

This is a nice guide thanks for sharing this will keep this in mind.

Aeolus - November 29, 2014, 10:03 am

Thanks For the Positive Replies! Glad to Share this!

aakash.pal1 - November 29, 2014, 10:21 am

will help a lot for everyone out there

tartou2 - November 29, 2014, 12:45 pm

You can also add trafficsia to the list

Rageki - November 29, 2014, 3:25 pm

Nice guide Aeolus

Hey tartou2, is trafficsia is really that good. I heard about it alot.

Aeolus - December 1, 2014, 5:46 am

Thanks for the replies! Hope more People will get help from this!

Azraelstear - December 1, 2014, 6:56 am

I must say I see flaw in this thread.

You don't work less then people doing daily job. You just earn more but usually work more time and your work is far more intensive.

Employed people are 8 hours at work but they work 2-3 hours, rest is spend by cigarettes, coffee, wandering offices, chit chat ...

Those which succeeded in online biz are those which generally worked up to 15 hours a day while starting. They might drop effort after achieving some decent milestone.

Whoever spends 2-3 hours working will not succeed in online nor offline biz.

One guy I've befriended 2-3 years ago started very effective app development company while he was 13 (in fathers name).

At this moment (he's slightly over 20), he have got over 20 highly paid employees, plus about 20 external programmers, graphic designers ..., massive deals and bucketload of money.

And guess what he does? He's often in office sunday / saturday nights.

Why? We see him working but he's not. He's fulfilling his dream. He does what he loves.
