Thread: [Twelve's cracking service \[Program Cracking\]](#)

Twelve - November 29, 2014, 4:07 pm

Hello Hack Forums

I'm very excited to do this service to everyone

What does this service do?

- We (My friend and I) will crack your program, in other words bypassing it's security and making it a free one (Without netseal or no registry key needed)

What do we need for this?

- The actual file you want to get cracked

What files do you accept?

- For this service we only accept .NET files (Not native) We will have native files cracking service later

How much for this service?

- It's only for \$15 or lower (Negotiable) and can pay by paypal or bitcoin

Do you bind your servet in files you've been cracked?

- No, we don't. We will scan it on virustotal, anubis, etc. And if you buy our service you will see the actual program working by share screening on skype or by teamviewer

How do we contact you?

- By private message me here or by adding me on skype "sphinx.twelve"

Add me for details or if you want to see some cracked programs thank you

T.O.S

- Every transaction is final, no refund,etc

- If the file is outdated, we will crack the program again and will give you 10% off

- Have fun

Have a nice day everyone ?
