Thread: [SQLi challenge](#)

JaNuS18 - November 30, 2014, 2:22 am

~ Task ~

- display version with your name
- display all tables from primary database sorted by table records count (descending sort order).

~ Site ~

aHR0cDovL3d3dy5sb3djYXJib25saXZlcnBvb2wuY29tL2xpdHRsZV9ncmVlbi9ib29rLnBocD9pZD0x

(Base64 decode it)

~ Proof ~

Spoiler ([Click to View](#))

Records count on your picture will be probably different than on mine as records count is changing...

~ Rules ~

- use colors,
- group_concat, benchmark and limit are not allowed

Post your solution at <https://privnote.com> and send me link to it

~ Solvers ~

- themastersinner

Edit:

Site is not vulnerable any more... Closed

k44j1gujj4r - November 30, 2014, 4:07 am

thnxxxxx i think i done so :)

~k44j1gujj4r~

You didn't. ? Sort tables by records count ?

Compare my picture with yours...

k44j1gujj4r - November 30, 2014, 4:48 am

got u now ;)

:)

~k44j1gujj4r~

themastersinner - November 30, 2014, 4:59 am

that was fun ?

techguyresearcher - November 30, 2014, 6:53 am

thanks 4 the Challenge MAn.....!

Don't use limit. Your injection should work without knowing how many tables there are...

?

c00perzz - November 30, 2014, 8:39 am

Guys when a challenge is over wouldnt it be good if methods were posted?

techguyresearcher - November 30, 2014, 11:37 pm

sOlution Plz?.....?

?

:)

:)

:)

:)

Guys,

sorting records is basic operation in SQL.

 How can such easy task stop you? I have more complex tasks on my list for you...

With my next few challenges I want to emphasize how important SQL knowledge is for SQL injection.  This challenge was start of that...

So don't expect challenges where solution is copy/paste DIOS syntax (without understanding it) and trying out few WAF combinations from some list to bypass WAF. Solvers will have to show some SQL knowledge and logic. Good luck

After some time maybe some tutorials will be made...

teknogeek - January 12, 2015, 6:06 pm

I'm quite new to all this. Can't seem to get it to sort by the number of records in each table. Help

anyone please?

Sahaj - January 15, 2015, 1:01 am

====404 not found.....==..... o.O

Lamer - January 15, 2015, 1:04 am

I solved it , the only thing I don't find is "sorted by table records count (descending sort order)"

JaNuS18 - January 15, 2015, 1:38 am

assassin20051 - December 23, 2015, 11:13 pm

can somebody tell me is the site still vulnerable ? as I am trying to to break the query but it's not giving me any error.

I have tried using ' , - , " but nothing seems to work.

I am still learning SQLi and tried a few basic challenges.

JaNuS18 - December 24, 2015, 4:25 am

(Dec 24, 2015 12:13 AM)assassin20051 Wrote: [\[CITE\]](#) can somebody tell me is the site still vulnerable ? ...

Not vulnerable any more... It is over a year old challenge... Try with same tasks on any other site you like...

assassin20051 - December 24, 2015, 5:24 am

Thanks JaNuS18 for the reply....I am going through your other SQLi challenges and as a request can you help me learn SQLi as I am facing some problems with it.

JaNuS18 - December 28, 2015, 3:37 pm

Sure, send me your SQLi related questions to PM. Keep in mind I don't help with SQLi challenges as that wouldn't be fair to challenge authors...

Mahbub404 - December 28, 2015, 11:49 pm

i can't error fixing please help me.

assassin20051 - December 29, 2015, 10:42 am

@JaNuS18

Thanks, unfortunately as it won't be possible for me to send PM, as my post count is still low.

Kashmiri_Wolf - May 5, 2016, 9:12 pm

Master ^_^ Site is not vulnerable now :/

JaNuS18 - May 5, 2016, 11:56 pm

It's an old challenge from 2014... ?

Kashmiri_Wolf - May 7, 2016, 1:52 am

? So Can I Do It On Local Host ?

THanks Master For Challenge
Site Was Not Vulnerable so i changed Site ?
I Cant Pm U Bcz I am new Here But Will PM u Soon Master Here is My POC :
