Which is the best and most secure VPN that keeps no records and accepts bitcoins as payment

Forezza - November 30, 2014, 4:40 pm

Create your own. That's the only way that you know there isn't going to be any logs VPS-side and there are plenty of VPS hosts that accept bitcoin as payment ;).

OnformGs - December 1, 2014, 12:26 pm

Try multivpn.ru or zorrovpn should be secure enough for your needs sir

BunnyBot - July 28, 2018, 4:37 am

for sure what is hidden by the encryption key, now I can advise the IPVanish VPN

I personally use [censored]. It is super secure, better yet. The account is cracked. If you want to purchase a [censored] account hit me up on telegram

@goonmeister

I will go first if you want, I don't really care lmao I got so many accounts.
