Thread: [urgent - guru of different coding languages needed](#)

blenblen2g2123 - November 30, 2014, 5:55 am

if you feel you are good enough for this then pm in inbox or send me your jabber or icq id...

note : you must be an experienced coder of a little bit of different language for this project and languages applicable are .

html
php
java
mysql
python

nOrr - November 30, 2014, 5:58 am

That's one interesting mix... what's up?

MrOrang - November 30, 2014, 6:04 am

As nOrr said what do you want to make?

And why would you need so many languages?

Chuck. - November 30, 2014, 6:05 am

I pretty much know them all apart from python.

nOrr - November 30, 2014, 7:15 am

He's a shady guy wanting stuff done to perform illegal activities. Not helping criminals. Not even for a payment most likely lower than my own job.

blenblen2g2123 - November 30, 2014, 7:29 am

funny, thats the way you see it. contract project worth 500\$ that wnt take you a day if you are serious is cheap?.hmmm.

\$500 is not enough for me to risk doing time and/or fines :P

Uncomplicated - November 30, 2014, 8:30 am

This should be posted in marketplace with sufficient information about the job.

fredchoco - December 1, 2014, 12:30 pm

Well I would be willing to help out but considering this seems to be a pit of a sketchy project proven by the fact no details are posted I'll pass.

borisganji1 - December 1, 2014, 12:33 pm

That looks like a recipe for a botnet including a crypter and a exploit kit
