Thread: [{TUT} How to Bypass Adfly + 200 Other "Skip Ad" Sites](#)

nondescriptoldie - November 30, 2014, 6:38 am

Hello guys! I am sharing another method with you guys! This time it is how to skip nearly any "Skip Ad" sites including Adfly!

REQUIREMENTS:

Grease-monkey
Script:

[Link](#)

METHOD:

Copy the contents of the script (Control+A, Control+C): [Here](#)
Go to about:addons in the URL (or go to the menu and click addons)
Go into the user script section
Click "New User Script"
Click "Use Script From Clipboard"
Close out of the window that pops up
Done

NOTES:

This will not be a heavily updated project due to the lack of people working on Github.

Works as of 30th November 2014

Just tried this out and works flawlessly! Will be a nice addition to my collection of userscripts.

The link for the script is broken, can anyone reupload?

Sorry for reviving the topic.

Sorry for reviving the topic.This doesn't work now m8.

Sorry and also the links got deleted from the maker.

It is a archived product! ?
