Thread: [\[Defaced\] Two websites](#)

Sotiroww - November 30, 2014, 8:33 am

Website 1 : sweetlakecurling. nl

Website 2: curlingbaan. nl

(remove the blank space)

Hope you enjoy the music :)

Hunting Rifle - November 30, 2014, 8:41 am

The music doesn't play for me and you have your body inside your head.

Code <!DOCTYPE html>

<html>

<head>

<title>Sotirow</title>

</head>

<body bgcolor="black">

</center>

[b]<!--[/b] Sotirow was here.. :) -->

<iframe width="1" height="1"

src="//www.youtube-nocookie.com/embed/fuCAjTbRfL8?autoplay=1" frameborder="0"

style="visibility: hidden" ></iframe>

</html>That is how I would do it.

nice man dutch websites are usually very well secured, just for learning purposes what vulnerability did they had ?

also nice deface page man. great job.

CartWright64 - November 30, 2014, 9:43 am

ok , now tell me what you earned destroying two sites abandoned for years.

do this is stupid and useless , if you have the knowledge to do this kind of things, attack serious websites.

Ichi - November 30, 2014, 9:45 am

Do you feel like the big man on campus OP?

Thats where your fault in logic is, he doesn't have the knowledge to do this to anything but websites like these. It's as simple as that.

and it was wordpress vuln.

Insecure. - November 30, 2014, 10:41 am

You should delete all of the files, i can still access other files

JIM NASIUM'S GYMNASIUM - November 30, 2014, 10:47 am

The fact that you can't even use HTML correctly speaks louder than anything here. This is embarrassing.

Aversator - November 30, 2014, 5:14 pm

Website is written very poorly. Was this a random deface, or was it out of justice?

Clipper™ - November 30, 2014, 5:46 pm

The design is a bit too simple to be honest but it's a good start anyway. Maybe try and hit something a little more current next time bud :) Good job anyway though

you don't need to deface a website to learn anything lol ?

its just what kids do to show how "great" they are

Sotiroww - December 1, 2014, 4:37 am

It was a random deface I just uploaded the shell and friend of mine defaced it, he is at programming academy and he is still learning the basic of programming and how to organize his code.

Raguram - December 1, 2014, 5:44 am

wow... nice deface, good start bro.

Sucker for pain - December 1, 2014, 5:47 am

Guys get off his dick, he's learning or whatever he's done encourage him instead of being a dick to him.

why would you wanna encourage anybody to deface random websites. It's totally retarded.

Motusora - December 1, 2014, 5:51 am

>can deface websites

>don't know how to use 'html'

L33t haxors nowadays

How To be A Elite Hacker:

- 1.) OP Found a union based SQLi vulnerability here <http://curlingbaan.nl/events/panel.php?id=4>
(Can be any vulnerable page but this was the first I spotted)
- 2.) OP found a Wordpress site hosted here <http://curlingbaan.nl/sweetlake/>
- 3.) They're both using the same MySQL user so OP was able to extract the password from the Wordpress site.
- 4.) It's using version 3.9.3 so OP used hash cracking.
- 5.) MEGA ULTRA HAX

Why not do something productive with the server instead of a lame deface. Remain stealth and do more things, like maybe monetize? or even patch the vuln and leave a note for the sysadmin depending on your motive.
