Thread: [/\[Release\]Java Regex SRC in regards to Zyped's Thread](#)

**??Austin??** - November 30, 2014, 2:29 pm

In regards to Zyped's thread I decided to post a project from a while back. It is a simple regex parser that uses the Java Regex api(standard with java). I am posting the code to gitHub so you can look though it if you'd like. There may be a few minor bugs and gitHub may be setup wrong since I never use it but I hope this helps someone.

That looks nice. I hate writing regexes. Regices. <- both spelling are technically correct.

Yeah I just copy most of the ones I use from online. They are powerful though.
