Thread: [Logo Wallpaper #2 - 3D/Cinema4D Effects](#)

UnfedZombieV2 - December 2, 2014, 1:55 am

Hey guys please tell me what you think of this image.
I made it in Cinema4D using my illustrator's path lines of my logo.
I also added in smoke e.t.c in Photoshop CC.

Please tell me honest opinions.

Are you fucking kidding me, don't spam this section just to get your post count up. I'm going to report your threads because they're unnecessary and you didn't even embed your images right, next time post everything in one thread.
