Thread: [\[TUT\] How To Spread Your RAT](#)

Mr. Anonymous - December 2, 2014, 10:04 am

firstly i would like to mention that this is mainly for "noobs" although this may also provide some helpful information for more experienced users
this is purely for educational purposes ?

so here are a few methods

-Torrents: download a cracked version of a popular product and bind your server to it and upload on torrents, although keep in mind other people will use this same method so test the crack (preferably in a virtual machine, if you test things in sandboxie im pretty sure they can still access certain information) before you bind anything as it might be infected and you ill just end up spreading for someone else

-Ewhore/Chat Rooms: this method is pretty successful however its not really "autopilot" (it can be but its alot less successful) so it may take you a while + some effort to get one install but this way you get money aswell. so to do this bind your server to a picture you want to use and spoof it to make it look like a picture, crypt for better results, if you intend to try and spread without a crypter you wont be too successful, a free crypter is almost as bad as no crypter. i highly recommend you buy a crypter if you dont already have one.

a few websites people will use to Ewhore

omegle

chat avenue

chat roulette

you could also leave your skype and dating websites or any other site where men are looking for this sort of thing

-youtube: you can bind your server to a popular program, some people will use a fake program like a facebook hacker, hacks for a game, some sort of keygen ect or you could use a legit program (which might help you keep clients) that people might want e.g auto clicker, account cracker, recording software and so on, this way you can target specific audiences like gamers, "hackers", males, females ect

-forums: (please dont use hack forums to spread, dont be silly) in certain forums there might be a interest in a particular program, claim to have that and link your server download link, this method may be really easy or really hard depending on the forum you choose, try to make yourself look like a legitimate user with high quality posts. im not going to suggest any forums but it should be pretty simple for you to target specific ones

-steam and origin: there are a few ways to use this type of spreading
become "friends" with people, to do this be very nice and helpful in game, get people to add you and ask them to add you on skype or something, from here you can claim to have hacks, free DLC, a skin duper or something but dont push it on them to hard just advertise the fact that you have them and wait for them to ask you for them, this way it seems less suspicious and if they find out you were lying you can play it off a few ways, say it works fine for you, block them ect. a few other methods you could use it to leave your link on your profile or PM/send people a message that might make them want to click the link. i would not recommend using all these methods on the same

account.

-social media: you can leave links to "pictures" that takes you to a blank webpage and auto downloads a spoofed image, advertise some sort of program that tells you how many visitors, likes or any other statistic you have. another way is to advertise a program that guarantees you however many followers. be creative on this one, use enticing link "pictures of you" and so on

-Your Friends: this is one i highly recommend you stay away from, ask yourself before you do anything is it really worth it to you? this way is simple to figure out yourself, you likely already know how "computer smart" they are and what they are likely to download

these are just a few methods of the top of my head, there are obviously more
just remember that creativity and originality is the key to this as methods you create/modify will be less saturated

i probably have made some mistakes in this but hopefully its easy to understand
i see quite a few people asking how people spread their RAT so i decided to put alot of information in one place (i am aware i am not the first to make one of these but people still ask so another one can only help)
i hope this helps ?

Pi_Rat - December 2, 2014, 10:05 am

Hi,are many tut like this on HF but any way thanks for share this :)

Preperition - December 2, 2014, 10:06 am

There are already tons of tutorial's here about this but thanks anyway.

InspectorGadget - December 2, 2014, 10:06 am

Nice for the effort however most of these are saturated.

Also just a tip - use capital letters at the start of sentences and full stops at the end, it's something a 7 year old should know how to do and without it anything you post just looks horrible.

AAE32 - December 2, 2014, 10:06 am

I like this Tutorial i hope that this will help the ohter members here :)

Mr_Anonymous - December 2, 2014, 4:33 pm

thanks guys

i know there are other tutorials and some of these methods are well used but they still work quite well and should be some what helpful for beginners

memanolz - December 4, 2014, 6:30 pm

this is a great tut man, helped me spread. now if only i had a crypter x.x, welp i gotta save up my cash

ankitchauhan - December 30, 2014, 3:02 am

THANK U VERY MUCH IT WAS VERY HELPFUL

[???] - December 30, 2014, 11:39 am

Thanks for sharing.

But if you want to actually get lots of slaves you are going to need an unsaturated method.

Mr_Anonymous - December 31, 2014, 8:55 am

i know but its just a starting point for new people. i tend to keep unsaturated methods to myself ?

King Louis XIX - December 31, 2014, 6:38 pm

wrong thread lol, but thanks man, this was same idea as other thread I had open

Executive - January 5, 2015, 10:10 am

I guess this is really helpful to beginners though :)

heinekeken - January 5, 2015, 8:59 pm

thanks for the tutorial, very helpfull for beginner

chochodecassidy - January 6, 2015, 8:48 am

Thanks for the Tut. please can you recommend binder to bind IM3 server

Tony201 - January 6, 2015, 9:16 am

thanks for the tutorial its always good having these around.

Mr_Anonymous - January 6, 2015, 10:22 am

French Products - January 6, 2015, 1:18 pm

Good tutorial ! it's nice for noob :)

Mr_Anonymous - January 8, 2015, 7:48 am

thanks guys, nice to see people appreciate it

i was going to update it and add some tools but i cant edit it anymore ?

gorpoc - January 10, 2015, 12:29 pm

Thats unfortunate but great tutorial. Youtube method works pretty well, from past experience using this method, in 2 days i got 100 slaves which is decent for noob starting.

Great tutorial even if all these method can be found in other thread.

Would +1 but no l33t ;)

Erayes - January 27, 2015, 12:49 pm

Thanks for this. It really helps a lot.

Universe_X - April 1, 2015, 8:19 am

Maan I suck at gaining bots I'm just looking for some1 that can talk me over how to do ewhoring for free.
